Ordering and Shipping

Order Information

Order Processing

Orders are processed by email (orders@enwork.com)

Acknowledgments

All orders will be acknowledged within 48 hours unless clarification, special engineering, or material sourcing is needed. Orders will be accepted, manufactured and invoiced based upon the information and terms on the acknowledgment. If there is any discrepancy, it is the responsibility of the dealer to notify our Customer Care department immediately at 800-815-7251.

Design Department

> For any special provisions, requests, or pricing questions, submit an email to designteam@enwork.com and our department will work quickly and efficiently to answer your questions.
> Quotes are typically turned around within 48-72 hrs.

Changes and Cancellations

Change or cancellation requests must be made in written form. Orders may not be changed or canceled without the written consent of Enwork. It's always best to contact Enwork immediately if a change or cancellation is being considered. Changes or cancellations are subject to the following fees.

> Orders shipping within 7 business days that include built-to-order products, are subject to charges equal to 100% of each order line.
> Orders shipping more than 7 business days: Dealer will be responsible for any manufacturing costs already incurred as well as a $250 (net) change/restock fee.

Product Lifecycle

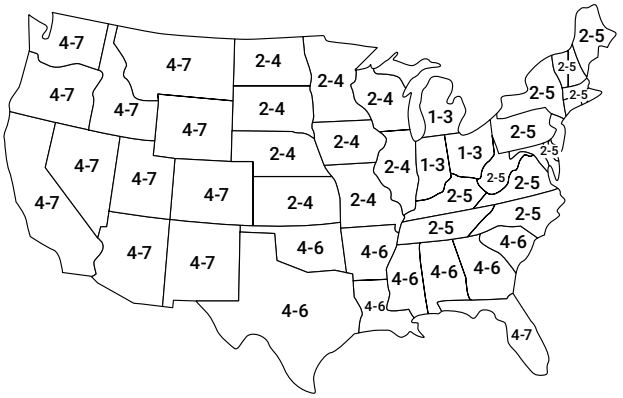

Enwork reserves the right to make changes in product design, or detail, and to discontinue any product or material without notice. Enwork will make a good faith effort to maintain product compatibility within our various generations of product platforms to provide our customers with spaces that adapt to change. Enwork's non-obsolescence policy commits to provide our customers with products of comparable function or operational characteristics for a term equal to the warranty period.

Shipment of Goods

Enwork ships products in the most efficient manner. Direct shipments and arrival appointments are available upon request for large orders that warrant full truck load shipment. These appointments are occasionally delayed by unforeseen circumstances, including traffic, equipment problems, inclement weather, and local limitations for large trailers. Enwork is not liable for carrier-related delivery issues. For shipments less than a truck load in size, Enwork will work with carriers to try to meet specific delivery date requests. Enwork does not guarantee arrival times for small orders (less than a truckload (LTL). Delivery by appointment (e.g. 9:00 am) is possible for an upcharge. Most of Enwork's LTL carriers can provide a 2-4 hour window in advance for delivery. Standard deliveries are made Monday through Friday between the hours of 8:00am and 5:00pm. The receiving party is responsible for unloading all freight at time of delivery. Shipments from Enwork may utilize load bars. Failure to take delivery will result in additional reconsignment and freight charges. If your delivery requires special accommodations not outlined here (e.g. driver assist), please contact Enwork prior to shipment. Accommodations may carry an upcharge.

Transit Time Guide

(in business days – not guaranteed)

International Shipping

Enwork will drop ship to any US port of embarkation (excluding Alaska & Hawaii) and will not be responsible for any additional packaging required after that point. Products that come standard assembled can be shipped knock-down (KD) upon request. Enwork will provide estimated weight & cube, but the dealer or freight forwarder is responsible for all customs/shipping paperwork as well as marine insurance. Product title transfers when it leaves our dock in Lowell, MI.

Ordering and Shipping

Storage of Completed Orders
Enwork does not have room to store product beyond the acknowledged ship date. In the event that a customer cannot accept delivery of a finished order, prior to shipment the customer can request that the order be shipped to an alternate address. In the event that no alternate address is provided, Enwork may choose to send the product to a storage facility. The customer will be responsible for charges associated with storage (including transportation to storage) as well as damage or loss risks.

Standard Freight and Minimum Quantity Terms
> Product is FOB Enwork freight prepaid in the continental United States. Title passes to dealer when it leaves our dock. Standard delivery procedure includes transportation of the shipment to the destination loading dock to be unloaded by the consignee. Truck drivers are required only to bring merchandise to the tailgate of their vehicle. Consignee must be present to inspect and sign for the delivery. If the consignee is not available at time of delivery, additional delivery fees such as storage charges and/or re-delivery may be assessed.
> Orders less than $2,000 net are assessed a $200 net freight fee with one exception.
    > There is no freight fee for orders less than $500 net that can be sent FedEx Ground (e.g. small legs, brackets, etc.). Orders $500 net or more that can be sent via FedEx Ground have a $75 freight fee.

Lift Gate and Special Freight Services
Requests for lift gate service, inside delivery, or special services/equipment (e.g. box trucks in big cities) may require additional shipping fees. Fees for lift gate service on small orders that fit on a box truck are $200. Fees for lift gates on larger orders that require a full 53-foot truck will be higher and must be quoted on a case-by-case basis. Lift gate options on full-trucks only exist on a small percentage of trucks thus driving incremental shipping costs that will be billed on a per-order basis. Call your Customer Care representative for more information.

Lead Time
Lead times vary. For current lead times and a list of Quick Ship products, consult Resources/Dealer Support at www.enwork.com. LEAD TIME DATE CALCULATION BEGINS AFTER RECEIPT OF A CLEAN ORDER. A significant amount of orders arrive at Enwork missing information to process the order so please review your order carefully. An accelerated lead time may be available upon request. Enwork will notify you of the anticipated ship date on your Order Acknowledgment.

Terms and Conditions

Exclusive Application of Terms and Conditions. These terms and conditions apply to all sales and related dealings between you, the customer ("Buyer"), and ASSA Group, Inc., dba Enwork, a Michigan corporation ("Seller"). No additional or contrary terms, whether contained in an order, acknowledgment, or other document from Buyer, shall be binding upon Seller unless agreed to in writing signed by an authorized officer of Seller, and Seller expressly rejects all such additional or contrary terms as may be contained in Buyer's documents. Seller's performance is conditioned on Buyer's unmodified consent exclusively to these Terms and Conditions. BUYER'S ACCEPTANCE OF ANY TENDER OF DELIVERY CONSTITUTES ACCEPTANCE OF ALL OF THESE TERMS AND CONDITIONS.

Price, Payment & Delivery. All prices are those indicated on this document or a separate term sheet incorporated by reference. If pricing is based on Buyer purchasing a certain quantity of goods and Buyer subsequently reduces the quantity purchased, whether by return, cancellation or otherwise, the pricing will be adjusted based on the amount actually purchased. The price and terms of this Agreement are confidential and Buyer shall not disclose them to any person or entity without Seller's written consent, other than to essential personnel. Seller reserves the right at any time to demand payment in advance of shipment. Prices are subject to change at any time without notice. Prices do not include handling or taxes, and Buyer is responsible to pay all taxes of any type or kind regardless of whether collected by Seller. The purchase price is due and payable 30 calendar days from the date of invoice or the date of delivery, whichever is sooner. Seller may refuse to ship where Buyer is in default under this Agreement or any other agreement between the parties. Any payments not timely received by Seller will accrue interest at a rate of 1.5% per month, unless not permitted by law, in which case the interest charge shall be the highest rate permitted by law. In order to ensure payment, and in addition to all security interests granted by operation of law, Buyer grants Seller a security interest in all items sold pursuant to this Agreement and agrees to allow Seller to sign all documents allowing Seller to perfect this security interest. In the event that such items could be deemed to be inventory, Buyer agrees to allow Seller to do all things necessary to perfect its security interest including, but not limited to, notifying existing secured parties and filing a financing statement prior to delivery of the goods. If any payment required under this Agreement is past due, Buyer shall be in default and Seller may exercise all of its legal rights and remedies, including those set forth in Articles 2 and/or 9 of the Uniform Commercial Code. Delivery is F.O.B. Seller's point of shipment. Title passes on Seller's delivery to the carrier. Delivery dates are estimates only, and Seller is not responsible for any delays of any type or kind. Seller may cancel this Agreement without advance notice in the event of Buyer's breach, for failure to give adequate assurances of future performance after Seller's request for such assurances, or for any other reason in Seller's sole discretion. If Buyer terminates this Agreement, it shall only do so on 30 days advanced written notice, and Buyer will remain liable to Seller for all costs, commitments and liabilities incurred by Seller while fulfilling its obligations under this Agreement, including overhead allocated by Seller to such costs and Seller's anticipated profit from this Agreement. If this Agreement is placed in the hands of an attorney for collection of any amounts due, Buyer shall pay all of Seller's actual attorneys fees and costs of collection.

Warranty

Exclusive 12 Year Limited Warranty
Enwork warrants that the goods shall be free from defects in materials or workmanship for a period of twelve (12) years except as follows. Select height-adjustable bases (Affinity, Cayman, Foundation Tapered Drum, Jet, and XTB4) are warranted for a period of seven (7) years. Height-adjustable tables (Lugano, Zori), electrical components, pneumatic cylinders, traditional key and lock cores, drawer slides, and glides are warranted for a period of five (5) years. Universal Locker digital and mechanical locks are warranted for a period of two (2) years. Casters are warranted for a period of one (1) year. There is no warranty for “self-edge" chipping or peeling, or on appliances.

Upholstery fabrics, vinyl, and polyurethanes are warranted from defects in material and workmanship for five (5) years. Customer’s own materials (COM) are not covered by this warranty. Consult with upholstery materials suppliers for performance criteria and suitability of individual materials. Textiles and laminates are sold subject to minor variations of color. Since textiles vary in weave, thickness and memory, some creasing and/or gathering may occur during the upholstery application process. Because leather is a natural product, variations of texture are common and should be expected. This warranty excludes any type of misuse, abuse, as well as ordinary wear and tear.

Pursuant to this warranty, if a product fails under ordinary use as a result of a defect in materials or workmanship, Enwork will, at its option, (a) repair the affected product at no charge, (b) replace the affected product at no charge with a new or refurbished product of comparable function, performance, and quality, or (c) refund the original purchase price for the affected product if repair or replacement is not commercially practicable or cannot be completed in a timely manner. This warranty applies solely to the original Buyer with the period starting on the date of shipment, and only for products shipped to and sold for use in the U.S. and Canada. This is Enwork’s sole and exclusive warranty, and the Buyer waives all others.

The foregoing warranty shall not apply to damage caused under the following circumstances: (a) damage caused during shipping (this will be handled under separate terms); (b) modifications or attachments to the product that are not Enwork approved; (c) products that were not installed, used or maintained in accordance with product instructions and normal industry practice; (d) products used for rental purpose; (e) damage caused by misapplication of cleaning product; (f) natural variations in wood grain, color, texture, figure, or the presence of character marks; or (g) changes in surface finishes due to aging or exposure to light; or (h) damage, marking, or staining of veneer surfaces due to contact with rubber or similar compounds, damage from sharp objects, or imprinting from writing instruments. If a damaged product is repairable, Enwork may, at its option, permit the Buyer to repair the item and Enwork will issue a credit to the Buyer in accordance with Enwork’s repair allowance schedule.

Warranty Disclaimer. Enwork expressly and unconditionally disclaims any and all warranties, express or implied, including but not limited to any warranties of fitness for a particular purpose or merchantability, or warranties based on oral representations from Enwork’s personnel or agents, affirmations, models, drawings, samples, promotional literature whether in print, on the internet or in any other format or media.

Limitation of Liability. Enwork’s maximum cumulative liability to buyer shall not exceed the purchase price of the goods claimed defective. In no event shall Enwork be liable for any indirect, incidental, special or consequential damages of any type or kind, including but not limited to lost profits, lost business opportunities or lost goodwill, relating to the goods sold hereunder, their installation or use, whether in contract, tort pursuant to statute or otherwise, even if Enwork has been advised of the possibility of such damages.

Indemnity. Buyer shall indemnify and save Enwork harmless from and against all claims of any type or kind for personal injury or property damage, including all costs and attorney’s fees, made or alleged as a result of Buyer in any way or manner incorporating or installing any item purchased herein into another product manufactured, assembled, sold or marketed by Buyer.

No Design or other services provided. This agreement involves the sale of goods only. Buyer does not hire Enwork to perform any design services or for the production of any drawing or other media relative to the goods sold pursuant to this Agreement or Buyer’s end product. To the extent that Enwork offers any advice or produces any drawings or other media, Enwork does so as a courtesy to the Buyer and Buyer agrees that it will not rely on such advice, drawing or other media and Enwork shall not be liable for any matter arising from such advice, drawings or other media. Buyer shall have no recourse against Enwork for any services of any type or kind. Buyer shall be solely and exclusively responsible for use and/or installation of all items purchased herein. The items sold herein are based on Buyer’s descriptions and Buyer bears sole responsibility for ensuring that the products sold meet Buyer’s needs and expectations and are suitable for Buyer’s intended use. Enwork is not responsible for Buyer’s inaccurate or inadequate design or Buyer’s furnishing of incorrect information.

Correction of Errors. Enwork shall have the right to correct any errors, whether clerical or mathematical, which are contained in this Agreement or any term sheet or invoice.

Warranty, Returns and Allowances, and Pricing

(Warranty Continued)

Disputes. All disputes of any type or kind, shall be determined by a court of competent jurisdiction which is situated in Kent County, Michigan. Buyer irrevocably consents to such exclusive venue and jurisdiction.

Miscellaneous. Buyer shall not assign any rights under this Agreement without the prior written consent of Seller. Failure to exercise any rights under this Agreement shall not constitute a waiver and a waiver on one occasion will not constitute a waiver of the same item on any subsequent occasion. No waiver or amendment to this Agreement shall be effective unless it is in writing and signed by authorized representatives of both parties. Paragraph headings are for reference only and are of no legal force or effect. All notices shall be provided to the addresses set forth in this Agreement and if none is provided, to the party's resident agent in the state of incorporation or organization. This Agreement shall be governed by the law of the State of Michigan without regard to any conflicts of law principles. Wherever possible, all terms shall be interpreted consistently. In the event of a conflict with regard to price, payment terms or delivery, the typed provisions on a separate or attached term sheet shall control over the printed provisions on this Agreement. For any other conflict, these Terms and Conditions shall control. No usage in trade shall create a conflict with the terms of this Agreement. Seller reserves the right to correct any typographical errors anywhere in this Agreement. A facsimile signature or a legally valid electronic substitute for a signature shall bind Buyer. If any provisions are determined to be unenforceable, the remainder of the Agreement shall remain in full force and effect.

Entire Agreement. This is the complete and exclusive statement of the terms and conditions relating to the subject matter of this Agreement and all negotiations and representations, if any, made prior to the execution of this Agreement are merged into this Agreement. Seller shall not be bound by any agent's or employee's representations, promises, or inducements not set forth in this writing unless such representation, promise or inducement is set forth in writing, dated subsequent to this Agreement, and signed by an authorized officer of Seller.

Product Issue Instructions

Shipping Damages and Claims

Should you receive any portion of a shipment in damaged condition, either apparent or concealed, it is the duty of the customer to note any suspected damage on the carrier's delivery receipt, to accept the damaged goods, and to contact Enwork immediately to begin the freight claim process. Do not install damaged product. All damaged product and packaging must be retained until the freight claim is settled. Failure to retain damaged product and packaging will result in a transfer of liability from Enwork to the customer. Enwork will not warranty custom one-piece tops over 96" from freight damage.
Concealed Damage: Freight damage must be reported to Enwork within 5 days of receipt. Failure to report freight damage within this timeframe will result in a transfer of liability from Enwork to the customer. Claims and questions can be submitted to info@enwork.com

Defective Products

Enwork may request samples, photos, or videos demonstrating the defect. No merchandise shall be returned or scrapped without prior approval from Enwork. All unauthorized returns may be refused by Enwork and returned to the customer. Credit or reimbursement will be issued for the original purchase price or a replacement will be sent. Enwork reserves the right to request the return of any or all defective products. Enwork also reserves the right to repair defects in the field with an Enwork-provided repair team.

Repair Authorization

Requests for Enwork funded repairs by Enwork dealers must be submitted in writing prior to repair work. Repairs made without Enwork's consent will not be funded. Repair costs for warranty or defect issues must be reasonable.

Credit for Returned Goods

Credit will not be honored for returned merchandise until all returned goods have been checked by the Enwork Quality Control Division and confirmed to be defective.

Pricing

Prices in this Price List are United States list prices and include freight (subject to minimum order quantities) within the continental U.S. and to most of Canada. Canadian market orders can be invoiced and paid in U.S. or Canadian dollars. Enwork's USD:CAD conversion rate is posted on enwork.com and typically updated quarterly. Canadian market orders must specify USD or CAD on the order. The Canadian Dollar price will be based on the conversion rate in effect at the time the order is received. For convenience, the exchange rate and GST will be included as separate line items on order acknowledgments and invoices.

COM Yardage Requirements

Procedure

1) Determine fabric roll width from the fabric manufacturer (Enwork uses the RAILROAD method exclusively) and corresponding fabric usage in the tables below
2) Calculate fabric required using the formula below
   a. (#UNITS x FABRIC USAGE) + 2.0

Ligouri Cushions COM Yardage Requirements

Procedure

1) Determine fabric roll width from the fabric manufacturer (Enwork uses the RAILROAD method exclusively) and corresponding fabric usage in the tables below
2) Calculate fabric required using the formula below
   a. (#UNITS x FABRIC USAGE) + 2.0
   b. Add 10% to accommodate fabric flaws, wrinkles and other imperfections
   c. Please order COM IN SEPARATE ROLLS for each product type (e.g. one roll for Cayman Fabric Walls, another roll for Ped Cushions) to accommodate multiple manufacturing centers. Tag each roll with the order number and send to **Enwork, 12900 Christopher Dr., Lowell MI 49331**

Lock Program

Lock Cores
Lock cores are TA Series for laminate products and LL series for steel products.
UM Series and alternate lock cores on select products are available upon request.

Lock program does not apply to Universal 12" and 15" mobile peds.

Keyed Random
Random locks automatically ship with the product unless otherwise specified. Random means no effort has been made to match key numbers, or to make them different.

Keyed Alike
For the convenience of the user, furniture may be keyed alike at no charge. Using the keyed alike instructions, order lock cylinders and keys as line items on your purchase order. The Enwork Grand Rapids Bush Lock Center will select key numbers. Key numbers will not be repeated unless the standard range has been exceeded.

Lock Distribution
Lock cylinders will ship separately from the product, ready for field installation. If there are other products on the purchase order, lock cylinders and keys will ship with the installation hardware kits. If the order is only for lock cylinders and keys, they will ship via FedEx. Please provide a contact name on your purchase order to receive the keys.

Installing Lock Cylinders
Installation of lock cylinders will be on-site. Enwork will not be responsible for lock cylinder installation. Lock cylinders are installed or removed using a change key. A change key is provided at no charge with each key-alike request. To order additional change keys, specify part number NWCHANGE ($20 list) on your purchase order. Cylinders must be in the unlocked position to be removed.

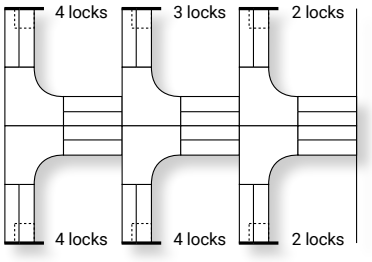

Lock Part Numbers for Laminate Products

Part #	Description	List Price
NWSPEC2-TA	Set of 2 locks	N/C
NWSPEC3-TA	Set of 3 locks	N/C
NWSPEC4-TA	Set of 4 locks	N/C
NWSPEC5-TA	Set of 5 locks	N/C
NWCHANGE-TA	Change/Master Key	$20

Lock Part Numbers for Steel Products

Part #	Description	List Price
NWSPEC2-LL	Set of 2 locks	N/C
NWSPEC3-LL	Set of 3 locks	N/C
NWSPEC4-LL	Set of 4 locks	N/C
NWSPEC5-LL	Set of 5 locks	N/C
NWCHANGE-LL	Change Key	$20
NWMASTER-LL	Master Key	$20

How to Specify Keyed Alike
Following is an example of how to specify
keyed alike locks for a 6-pack of workstations with steel storage.

Step 1 – Using the floor plan (right), count the number of locks in each workstation.

Step 2 – Count the number of workstations with the same quantity of locks.
3 workstations with 4 locks per station
1 workstation with 3 locks per station
2 workstations with 2 locks per station

Step 3 – Ordering info:

QTY	Part #	Description	List Price	Ext. List
3	NWSPEC4-LL	Set of 4 locks	N/C	N/C
1	NWSPEC3-LL	Set of 3 locks	N/C	N/C
2	NWSPEC2-LL	Set of 2 locks	N/C	N/C

Enwork will select key numbers for each set from the available numbers.

Enwork Product and Finish Information

Grain Direction on all wood grain laminates runs as shown below. Alternative grain directions are available for a charge. Great care is taken on multi-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances.

Rectangles and Similar

Extended Curved Corner

120 Degree Corner

**Exceptions*: Veneer tops with 2 or more pieces and laminate tops 66"D and 72"D are cross grain.

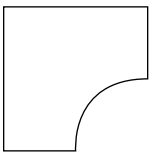

Laminate Tables with wood edge have the following solid wood edge thicknesses (top view):

1. 3mm edge is 0.12" wide.
2. Knife edge is 1.9" wide.

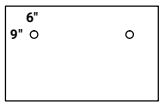

Veneer Tables with wood edge have the following solid wood edge thicknesses (top view).

1. 3mm edge is 0.12" wide.
2. Knife edge is 0.12" wide (3mm). Undercut is MDF stained to match.

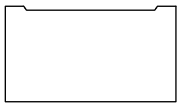

Cable Management Solutions are offered in a variety of styles. The following options are available:

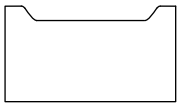

No Cable Management

Powerlex Grommets (6" from rear and 9" from side edge to center)

Full Scallop (1-1/4" from rear, starts 6.3" from corner)

3" Full Scallop (3" from rear, starts 6" from corner)

Satellite Power Routings for use with Satellite power units on conference table bases with troughs/beams or Drum bases where undersurface routings are required to get Satellite cords into the interior of the base. This same condition exists with Landing tables and getting the cords past the keels.

Products requiring routings: Alkalign, Camber, Equilibrium, Expanse, Foundation, Foundation EX, Odyssey, Landing, Lugano, Stealth

Rounded Rectangle Tops (SF) usually have a 2.5" radius. Exceptions include:

- Laminate - Plyband Edge (L) have 4" radius.
- Laminate - 3mm Wood Edge (E) have 6" radius.
- Veneer - 3mm Wood Edge (P) have 6" radius.
- Veneer - Knife w/ 3mm Wood Edge (R) have 6" radius.

Enwork Supports and Bracing

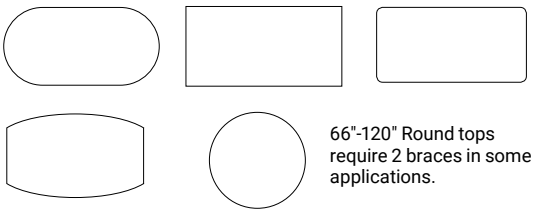

Worksurface (Top) Support and Bracing Rules

- **Conference and training table tops 60"wide and wider come with support braces (NWBRACE) at no charge, if required. See page 24 for a list of how many braces are included per top.**
- **Workstation worksurfaces do not include braces due to unknown applications (peds, lats, etc.).** Standard laminate worksurface (NWBRACE) support is required on unsupported spans 54"W and wider. Supports can be fixed peds, legs, or braces.
- **The maximum allowable span between legs or supports is 72" - even with braces.**
- As an alternate to braces, legs may be inset from table ends.
- All 30"D tops 72"W or wider, as well as tops 36"D or deeper and 60"W or wider, require two braces instead of one. Braces are included automatically on all conference and table tops, if required.
- Foundation Panel Base Trough Kits, Stealth, Lugano, Equilibrium, Expanse, Odyssey, Foundation EX, and Camber conference tables are designed with support and don't utilize stand-alone (NWBRACE) braces.

- *For additional information about bracing installation for Training and Conference tops, please visit enwork.com/resources/planning-installation-guides.*

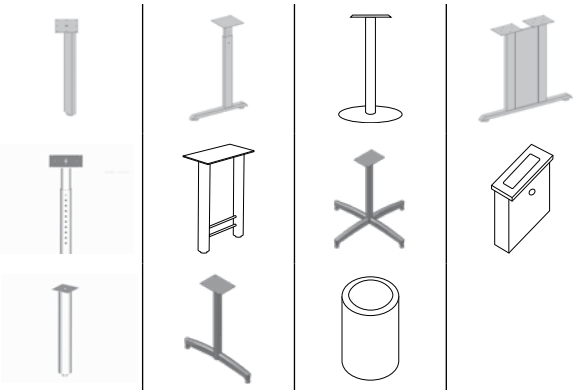

Any Top - Any Base

Any Top

Top and Casegood Specifications

General Information on Wood Cores
> Passes all NEMA and BIFMA tests for high pressure laminate worksurfaces.
> Core material is 1.125" thick, M3 rated (45 lb.) furniture grade particleboard.
> FSC Mixed Sources accreditation.
> ISO 140001 certification for wood cores.
> Made from 30% post-consumer and 70% pre-consumer recycled content.
> Eco-Certified Composite Grademark Program (ECC) certified by Composite Panel Association (CPA).
> CARB Phase 2 and EPA TSCA Title VI compliant for formaldehyde emissions less than 0.09ppm.
> Adhesives are solvent free water based PVA (poly vinyl acetate).
> Formaldehyde-free cores are available via special quote at designteam@enwork.com.
> Tables have a 200 pound load capacity (functional load), excluding disc bases.
> Disc bases have a 125 pound load capacity (functional load).

Standard Laminates and Melamines
> HPL (high pressure laminate) construction, .030" or .050" thick depending on color.
> Backer is moisture-resistant phenolic material for balanced construction.
> Laminates and backers are Greenguard certified for Indoor Air Quality.
> PVC (default) or ABS (upon request, call for quote) edge choices in 3mm, and Knife.
> Other edge choices include Veneer and Solid Wood.

Wood Veneers
> Natural veneers are used in Ash, Maple, Walnut, and Rift Cut White Oak species.
> Single piece tops use slip-matched veneer with grain running the width of the top. Tops with two or more pieces use slip-matched veneer with grain running across the depth of the top (also known as cross grain).
> Grain and color variations may occur in veneer products because of the inherent nature of wood. Every effort is made to achieve consistency; however, exact matching is not guaranteed.
> Wood is susceptible to normal wear-and-tear, including natural fading/color change due to aging and light exposure, scratching due to aluminum/steel, and other abrasions. Care should be taken when using or referencing wood veneer surfaces and samples.
> Edge choices are 3mm (wood), or Knife (wood)
> There is a custom stain match upcharge that assumes a custom color on a standard Enwork veneer substrate. Upcharge varies by product.
A separate custom stain match PO should be submitted in advance of the full order to orders@enwork.com along with a sample mailed to Enwork, Attn: STAIN SAMPLE.
Production cannot begin until the stain match is approved. If during this process it is determined that one of our standard veneer substrates is not acceptable, additional charges and lead time may apply.

Birch Ply Edges
> Edge is clear coated when specified with laminate and stained-to-match when sold with veneer.
> Due to material sizes and necessary trimming, 48"D tops and 60"D tops are undersized by one inch. Tops with pieces 60"W and 96"W will also be undersized one inch.

Tambour
> Available in White Oak with either a clear coat or stain.
> Grain and color variations may occur in tambour products because of the inherent nature of wood. Every effort is made to achieve consistency; however, exact matching is not guaranteed.
> Slat width is 3/4". The profile is 0.20" deep and 0.30" wide.

Back-Painted Glass
> 1/4" thick, tempered, flat-polished low iron. Available as clear glass (B) or satin-etched/frosted glass (D). Glass sits on a 1-1/8" knife edge MDF substrate painted to match*.
White (matches Benjamin Moore Brilliant White paint), Black, and Light Beige are standard finish colors. Any Benjamin Moore color available upon request. $1500 list custom color fee applies for orders of less than 250 sq. ft. There is also a 20% upcharge to each top's list price for custom colors**.
> Glass may overhang MDF substrate up to 1/8" on each side.
> Glass width and depth may vary 1/8" from piece to piece due to cutting machine tolerance. If depth varies, position all pieces in the center resulting in a 1/16" offset on each side.
> Single-piece custom patterned/logo tops are back-painted. Multi-piece patterned/logo tops have a printed backer. Certain blue/gray colors may not produce accurately on printed (multi-piece) tops. Consult Enwork if perfect color match in this situation is required.
> Glass is susceptible to normal wear-and-tear. Scratching may be caused by steel and aluminum (or similar) objects.
Care should be taken when using glass surfaces.
> Due to glass weight, only specify on complete conference bases or Sawhorse/Alkalign individual legs installed in a splayed position.

*The side and cut of the MDF substrates are painted.
The top and bottom of the substrates are exposed backer and not painted.

**Enwork makes every effort to accurately produce custom colored back-painted glass using the best specialized low-iron glass on the market. Despite these efforts, there is still a natural iron variation in all glass on a sheet-by-sheet basis which affects color match (iron causes a green hue in glass color). Similar to a wood veneer, where no two trees are the same, a glass sample may not perfectly match the final product.

Solid Surface
> Standard pricing is for 1-1/4" knife edge in Corian Glacier White with a satin finish.
> For custom finishes and colors, contact designteam@enwork.com. Solid Surface with veining or other patterns is not available in multi-piece tops over 144". Cambria Quartz is a recommended alternative.

Silestone Quartz

> Standard finish for Bronze Rivers, Calacatta Themis, Helix, Miami Vena is polished. Standard finish for Charcoal Soapstone is suede. Pricing is for standard finish only. Other color selections or non-standard finishes will require a custom estimate through designteam@enwork.com

> Silestone quartz for conference tops is 0.75" thick and is supported by a 1.125" thick painted MDF knife edge sub-top that is insert by 2" on each side for a floating quartz look. Due to heavy quartz weight only specify on complete conference bases, not individual legs.

Note: MDF substrate is painted black for Charcoal Soapstone and white for Bronze Rivers, Calacatta Themis, Helix, and Miami Vena.

Cambria Quartz

> Standard finish for Ainsley, Berwyn, Carrick, Portrush, Swanbridge, and Whitehall is High Gloss. Standard finish for Inverness Stonestreet is Satin. Pricing is for standard finish only. Other color selections or non-standard finishes will require a custom estimate through designteam@enwork.com.

> Enwork sells three different thicknesses of Cambria quartz (0.25", 0.75", 1.25") depending on application.

1. Conference Tops are available in 0.75" thick quartz:
   a. 0.75" thick quartz that is supported by a 1.125" thick painted MDF knife edge sub-top that is inset by 2" on each side for a floating quartz look. Due to heavy 0.75" thick quartz weight only specify on complete conference bases, not individual legs.
   b. Note: MDF substrate is painted grey for Carrick, light beige for Berwyn, black for Inverness Stonestreet, and white for Portrush, Swanbridge, Ainsley, and Whitehall.
2. Landing Tables utilize 1.25" thick quartz in lieu of the laminate top.
3. Credenza Toppers are available in two thicknesses:
   a. 0.25" thick quartz toppers are utilized with the Universal Credenza family of products. The toppers set directly on top of the credenza and are secured by silicone adhesive (included).
   b. 0.75" thick quartz toppers are available for Foundation and the Universal Credenza family of products. The toppers sit directly on the credenza, but do not need silicone due to their weight. Note: For Foundation Credenzas specify the "B" Specialty Top option to omit the standard thickness laminate top and get a sub-top instead.
4. Occasional Tables
   a. Oh-Hey utilizes 0.25" thick quartz set directly on top of the Oh-Hey product and secured by silicone adhesive (included).
   b. Occasional Thin Profile Tops for use with Tangent, etc. Bases utilize 0.25" thick quartz on a 0.75" thick painted MDF substrate with matching dimensions. Quartz is secured by silicone adhesive (included). See 1b above for painted MDF color specification.

Quartz Pattern Alignment:

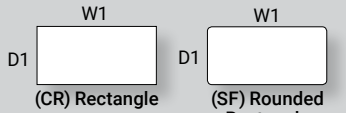

1. Quartz patterns on multi-piece tops do not align perfectly for veining/pattern match.
2. For those patterns that have a veining to them, a Slabsmith image will be sent by Enwork Customer Care 1-2 weeks after order entry for customer approval. Slabsmith shows the expected pattern on the table top given slabs that are availabe at the time of manufacturing. Every effort is made to cut the tops according to the approved Slabsmith. However, variation can happen and is unavoidable at times. Veining may shift by up to a few inches from what is shown in Slabsmith. Tops with this situation will not be considered unacceptable.
   a. Slabsmith is a tool primarily to see the movement of patterns that have a high degree of variation in veining. It is not meant as a design tool to get veining exactly where the customer wants it.
   b. Slabsmith is not intended to show color or hue of the materials being shown and should not be relied on for color match.
   c. Slabsmith images contain round marks which are target points applied to the slabs for the Slabsmith image only. They are not a part of the material or pattern.

Product Specifications:

> Edge profile is the same on all sides.
> D2 is 12" less than D1 on Boat and Rounded Diamond tops.
> For Wedge Tops, D2 is 36"
> Laminate with knife wood edge (G) is 1.9" wide. Veneer with knife wood edge (R) is 0.12" wide (3mm).
> Great care is taken on multi-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances. Tops that have 3+pieces are not guaranteed to be a perfect grain match.
> Multi-piece tops come with alignment hardware.
> See page 32 for additional finish specifications.

Ordering Information:

Product Specifications:

> Edge profile is the same on all sides.
> D2 is 12" less than D1 on Boat and Rounded Diamond tops.
> For Wedge Tops 72"-96"W, D2 is 42" and 108"-240"W D2 is 36"
> Laminate with knife wood edge (G) is 1.9" wide. Veneer with knife wood edge (R) is 0.12" wide (3mm).
> Great care is taken on multi-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances. Tops that have 3+pieces are not guaranteed to be a perfect grain match.
> Multi-piece tops come with alignment hardware.
> See page 32 for additional finish specifications.

Product Specifications:

> Edge profile is the same on all sides.
> Quartz is 3/4" thick.
> Glass is 1/4" thick.
> Tops do not include external braces as they are intended for use with Expanse, Odyssey, and Foundation EX bases.
> Great care is taken on multi-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances. Tops that have 3+pieces are not guaranteed to be a perfect grain match.
> See page 32 for additional finish specifications.

Product Specifications:

> Multi-piece tops come with alignment hardware.
> See page 32 for additional finish specifications.
> Laminate with knife wood edge (G) is 1.9" wide. Veneer with knife wood edge (R) is 0.12" wide (3mm).
> Great care is taken on 2-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances.

U.S. Patents No. D776,474S, D776,967S, D776,968S

Product Specification:
> Bases support conference tops 36"-54"D and all 60"D tops except solid surface and quartz.
> Bases for solid surface and quartz 60"D tops and 66"-72"D tops see page 108.
> 29"H bases have a footprint of 26"W x 16"D. 42"H bases have a footprint of 33"W x 16"D.

Ordering Information:
> Bases require Cantilever Top Supports, ordered separately.
> Bases are ordered in multiple pieces for design and paint color flexibility.
> Base must bolt to a 4" concrete floor. Fasteners provided.
> Power data units are housed between cantilever supports. Ordered separately.
Exception: Positioning for some power/data assemblies (e.g. Oasis) is limited due to base structure. Daisy chain Oasis/ Ghost units do not fit. Plug units fit.
> Cantilever support trough covers provided to conceal power and cable routing on solid design cantilevers (only).
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Tip: Inverse V bases include magnetic inner cable management covers.
Two of 4 inner covers have a mousehole for cord pass thru.
Tip: Bases require Cantilever Top Supports, ordered separately.

Seated Height Equilibrium Triangle Base, 29"H		
EQT296E^	Triangle Base (only), for 36-*60"D x 84-144"W tops with Centered Cantilever Supports	$12,684
EQT298E^	Triangle Base (only), for 36-*60"D x 156-240"W tops with Centered Cantilever Supports and 36-*60"D x 120-192"W tops with Offset Cantilever Supports	$12,985

Tip: Triangle base includes one set of magnetic cable management covers.
Tip: Base is open in the middle. End covers fully enclose the base, concealing hardware, technology, and floor monument.
Tip: Bases require Cantilever Top Supports, ordered separately.

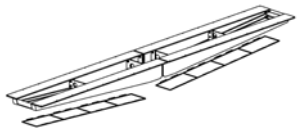

***Bases on this page support all 60"D tops except solid surface and quartz tops. For bases that will support 60"D solid surface and quartz tops, see page 108.**

Disclaimer
Equilibrium tables must be installed directly onto a four inch minimum thickness concrete floor using factory provided hardware.

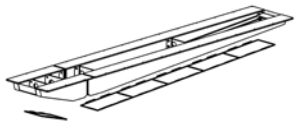

Warning
- Failure to install on four inch thick concrete floor or failure to follow instruction may cause table to function improperly and could lead to personal injury and or structural damage.
- Equilibrium assembled can weigh between 350 and 1,700 pounds depending on configuration and is supported in a three and a half square foot area. It is the responsibility of the dealer and or end user to determine if the installation location for Equilibrium is suitable.
- Enwork is not responsible for any structure failures or personal injuries due to improper installation or improper use of product.

Note
Installation requires at least two people.

Product Specification:
> Equilibrium Freestanding Plate can be used to anchor select Equilibrium bases without having to bolt them to the floor. Only works with EQV296, EQV298, EQT296E, and EQT298E with CENTERED cantilever supports. Is not compatible with EQV426, EQV428, EQV297, EQV299, EQT297E, and EQT299E bases or offset cantilever supports.
> Carpet can be placed over the plate to conceal it or under the plate.
> Freestanding Plate comes with set screw levelers in both black and zinc finishes that are installed on site.
> Freestanding Plate ships in two pieces that are 15"D x 55"W x 0.5"H. Final foot print once installed is 30"D x 55"W.
> Contains a 12"x12" center cutout to allow access to a floor core.

Equilibrium™ Angled Base for Round Tops

U.S. Patent No. D873594

Product Specification:
> Bases support round tops 36-84" diameter.
> Angled base for 60-84" round tops have a footprint of 8"W x 6"D. Angled base for 36-54" round tops have a footprint of 6"W x 3.5"D.
> Bases for 36-54" round tops have 5.875"D x 13.5"W x 3.5"H power data clearance and will accommodate Axil, Ellora Single-sided, Node, and Ellora B units. Some unit orientation limitations may apply.
> Bases for 60-84" round tops have 9.875"D x 22"W x 3.75"H power data clearance and will accommodate Axil, Ellora Single- and Double-sided, Node, and Ellora B units. Some unit orientation limitations may apply.

Ordering Information:
> Angled bases for round tops include cantilevers
> Base must bolt to a 4" concrete floor. Fasteners provided.
> Removable covers provided to conceal power and cable routing for all bases.

Disclaimer
Equilibrium tables must be installed directly onto a four inch minimum thickness concrete floor using factory provided hardware.

Warning
- Failure to install on four inch thick concrete floor or failure to follow instruction may cause table to function improperly and could lead to personal injury and or structural damage.
- Equilibrium assembled can weigh in excess of 500 pounds depending on configuration and is supported in a 0.33 square foot area. It is the responsibility of the dealer and or end user to determine if the installation location for Equilibrium is suitable.
- Enwork is not responsible for any structure failures or personal injuries due to improper installation or improper use of product.

Note
Installation requires at least two people.

Product Specifications

> Height range is 29.6" to 45.3".
> Laminate and veneer bases have multiple seams and don't have perfect grain match.
> Includes digital programmable handset.
> For aesthetic purity, Height Adjustable Tapered Drum bases have no access door. Enwork recommends tilting the table when needed to plug in column and power. Cords route out the bottom of base between levelers.
> Column shroud is 10" diameter.
> Power: accommodates Cove Round, Axil 2-Power, and Node. Ordered separately.
> Tapered base and column shroud have matching finishes. Contact designteam@enwork.com for a special base if mixed finishes are desired.

Ordering Information:

> Tops and power ordered separately.
> When ordering with a quartz round top, a 24" base supports up to a 42" diameter top, and a 30" base supports up to a 54" diameter top.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Product Specifications:
- > Double support panels (11"H) run the entire length of the top to hide power data units and cables. 24"D tables have one support panel flush with back edge and one inset. All other depths have support panels that are centered.
- > For 24"D tables, cable management options G, K, and C will be located center rear on the table.
- > Tables with quartz and solid surface tops come with wire chase for structural support.
- > Solid surface and quartz not available on 24"D or 30"D tables.
- > Solid surface and quartz options apply to top only. Laminate options must still be selected in Steps 5 and 6.
- > Tables 108" and longer have a center panel.
- > Part number includes entire table (ie. top, sides, and structure).
- > Optional footer bars are 7" from the ground.
- > Great care is taken on 2-piece tops to match laminate wood grains as close as possible given the limitations of pattern, shape, laminate repeatability, and manufacturing tolerances.
- > **Accent lights ordered separately.**

Product Specifications:

> Overall table height with top is 29.75"H.
> Legs are solid wood; clear coat, stained or painted with precision aluminum detailing and top trim (finish of aluminum matches frame)
> Legs are tapered "D" shape. Leg profile dimension 1.75"D x 2.75"W at thickest point (top of leg) (Exception: standing height conference table base legs are 2.25"D x 3"W).
> Legs ship subassembled, frames ship unassembled.
> Conference Bases and larger X-bases create a floating top aesthetic. They include stanchions to create a 2.8" gap between top and frame. Touchdown tables, Occasional tables and small X-bases attach directly to the frame.
> Base works on rectangle and rounded rectangle top shapes.
> Frame is aluminum; painted or polished.
> When space planning seating arrangements, be aware that corner table legs are angled 8" into the available knee space. Middle support legs are near the edge of the table and will also affect available knee space.
> Bases support laminate and veneer tops only. For glass tops order add-on struts. 0.75" quartz tops are not compatible with Ligouri. See page 159.

COORDINATING FURNITURE

See pages 285-290, 298-312 for coordinating Ligouri furniture.

Ordering Information:

> Tops are ordered separately.
> Vertical cable management and Power/Data under-table covers are ordered separately. See page 159.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

COORDINATING FURNITURE

See pages 285-290, 298-312 for coordinating Ligouri furniture.

Product Specifications:

> Overall table height with top is 29.75"H.
> Legs are solid wood; clear coat, stained or painted with precision aluminum detailing and top trim (finish of aluminum matches frame)
> Legs are tapered "D" shape. Leg profile dimension 1.75"D x 2.75"W at thickest point (top of leg) (Exception: standing height conference table base legs are 2.25"D x 3"W).
> Legs ship subassembled, frames ship unassembled.
> Conference Bases and larger X-bases create a floating top aesthetic. They include stanchions to create a 2.8" gap between top and frame. Touchdown tables, Occasional tables and small X-bases attach directly to the frame.
> Base works on rectangle and rounded rectangle top shapes.
> Frame is aluminum; painted or polished.
> When space planning seating arrangements, be aware that corner table legs are angled 8" into the available knee space. Middle support legs are near the edge of the table and will also affect available knee space.
> Bases support laminate and veneer tops only. For glass tops order add-on struts. 0.75" quartz tops are not compatible with Ligouri. See page 159.

Ordering Information:

> Tops are ordered separately.
> Vertical cable management and Power/Data under-table covers are ordered separately. See page 159.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Quantum Modesty Panels

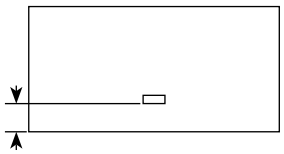

Product Specifications:

- For powered tables there are two modesty panel design choices:
  - Quantum Integrated Folding Modesty Panels (9"H) have a mechanism that is linked to the top mechanism to pivot (fold) the modesty in alignment with the angled leg for use in nesting tables. Accommodates an Axil power unit only. When the top is in use (flat) this modesty is vertical and inset 1.75" from the back of a 24"D top and 4.75 from the back of a 30"D top. This modesty requires the power unit to be located more centered in the top on 30"D tops (6.75" from back edge). On 24"D tops, the power unit is located at the standard 3.75" from back edge.
  - Universal Pivoting Modesty Panels attach to the bottom of the top. Undersizing modesty by 12" is required to allow modesty to fold properly BETWEEN THE LEGS. This modesty is on the far back edge and gets the power unit furthest to the rear of the top.
- Rounded corner Quantum Integrated Folding modesty panels have a 2.5" radius on the bottom (only) of the modesty panel to match rounded corner tops.
- PDGR cable managers (ordered separately) are recommended for routing cables along the underside of the top.

Understanding VOU

Introduction

When you need a V, O or U-shaped boardroom or conference room solution that looks great, is simple to order and quick to install then VOU is the solution for YOU. Let's get into the cool stuff:

- Aesthetically VOU has clean lines, tight tolerances and a light design crispness that is traditional in concept but modern in execution.
- Design options like LED lighting and designer trims create unique ways to dress up your environment.
- VOU's fully assembled modular base design makes for quick installation. Its removable panels, generous cable pathways and open bottom panels give your facility management team a product they can work with.
- A robust statement of line accommodates many applications for rooms of all shapes and sizes.

Need more? The Enwork design team (designteam@enwork.com) is ready and available to customize VOU to fit your individual needs.

Specifying VOU

1. Pick a Base
2. Pick a Top
3. Pick a Power System

Three part numbers. Simple!

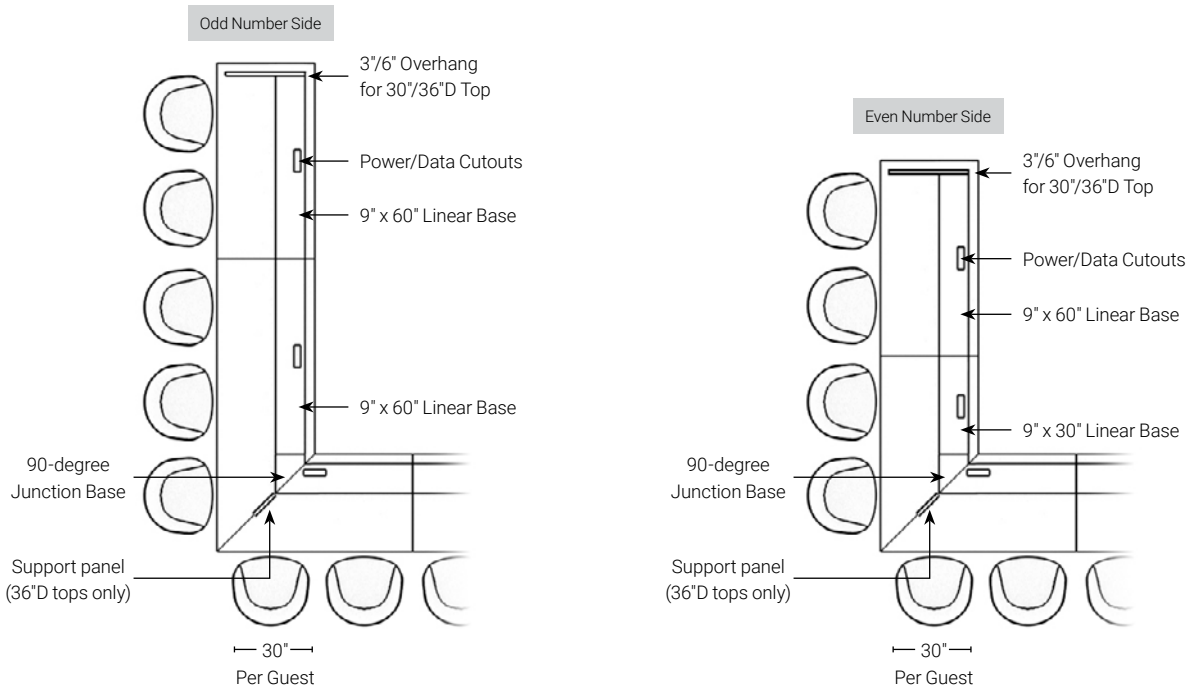

VOU Dimensionality

VOU is designed around 30" wide spacing per guest. O- and U-Shaped tops are available in 30" deep or 36" deep. V-Shaped tops are available in 30" deep. Modular 30" and 60" wide x 9" deep linear bases are combined with the appropriate 90-, 95-, 100- and 150-degree corner bases to configure an immense variety of V, O, or U-shaped tables up to 300" (25') wide.

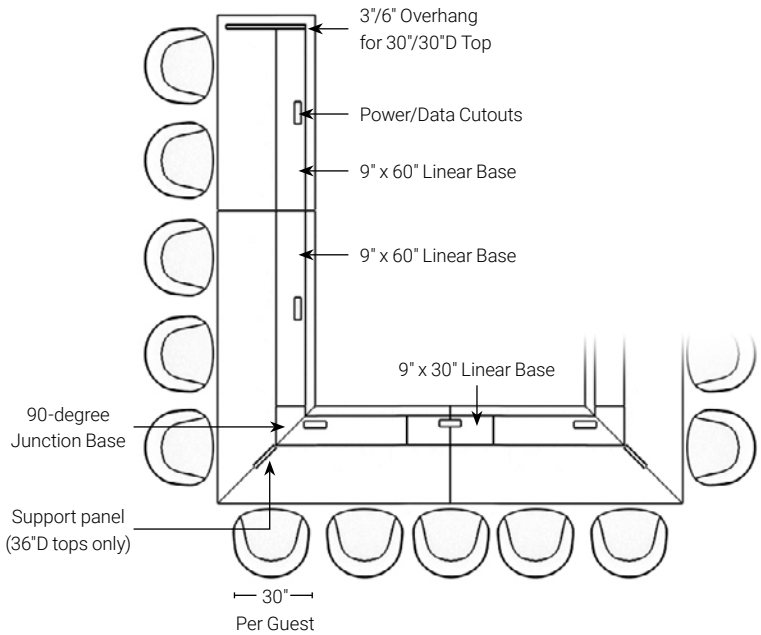

VOU multi-piece tops ship in modules of 30", 60" and 90" widths. Laminate and veneer versions are tight jointed together for a seamless look (top-to-top seams have no edgeband). Glass is also available. 30" deep tops overhang by 3" on the rear of the VOU bases and 36" deep tops overhang 6". Both top depths overhang 3" on the ends.

Kneespace is 18"D on 30" deep tops and 21"D on 36" deep tops. V- and U-shaped tables include a 24"D end panel at the end of each run. 36" deep tops also have an additional 8"D support panel in the corners.

4-Person O/U Bottom

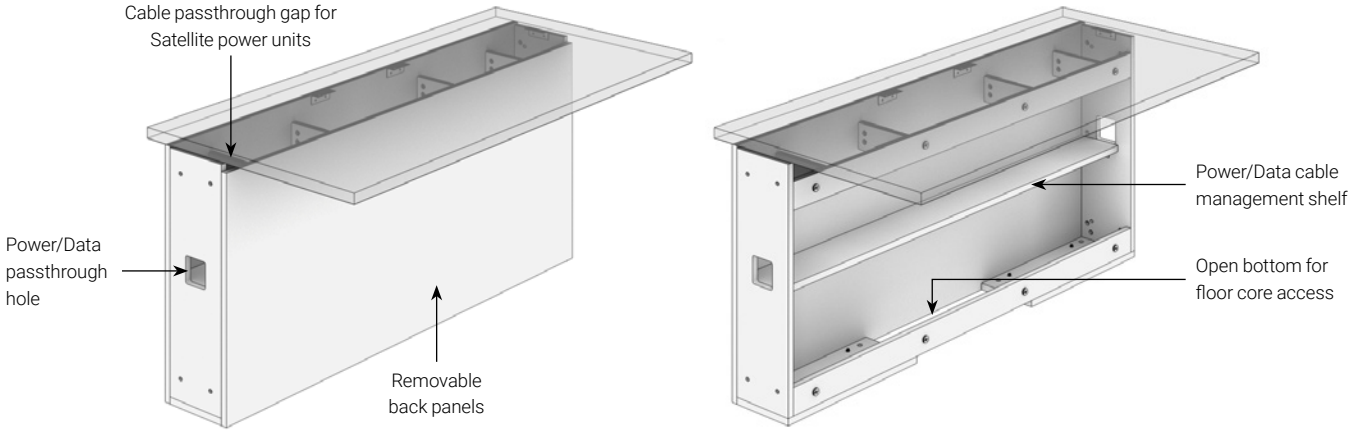

5-Person O/U Bottom

Understanding VOU

VOU Bases

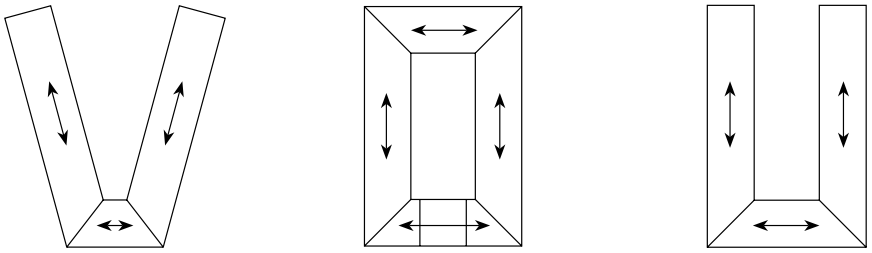

VOU Tops

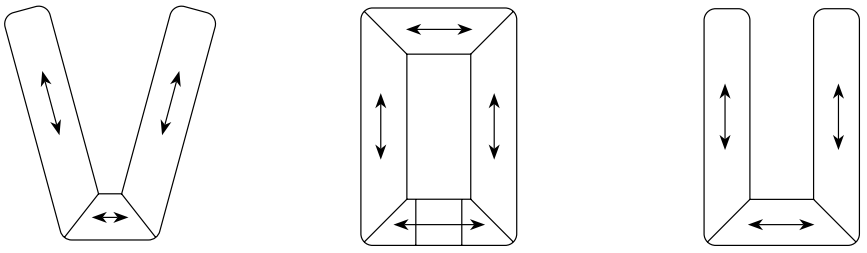

VOU Tables are available in a rectangular or rounded shape and include mitered corners. Rounded shape tops have a 5" outer radius.
↔ = Laminate grain direction (**veneer is always short grain**).

Important Laminate Note: Great care is taken by Enwork craftspeople to deliver a beautiful table that optimizes grain match. Perfect grain match on V, O and U-shaped tables is not possible at all seams in all directions. Priority is given to grain match the long direction first. Grain match on mitered corners is optimized second and grain match along the short side is optimized third.

Angled Corner Laminate Grain Direction

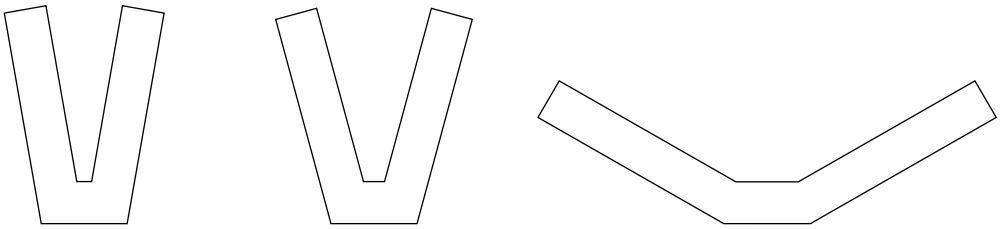

Rounded Corner Laminate Grain Direction

Understanding V-Shaped Tables

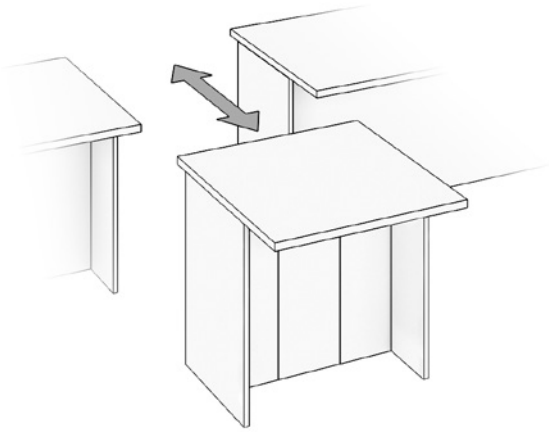

V-Shaped tables are available with 95-, 100-, and 150-degree corner bases. The 95-degree and 100-degree bases are designed for conference applications. The 150-degree base is designed for wide-angle teleconference applications.

95-degree 100-degree 150-degree

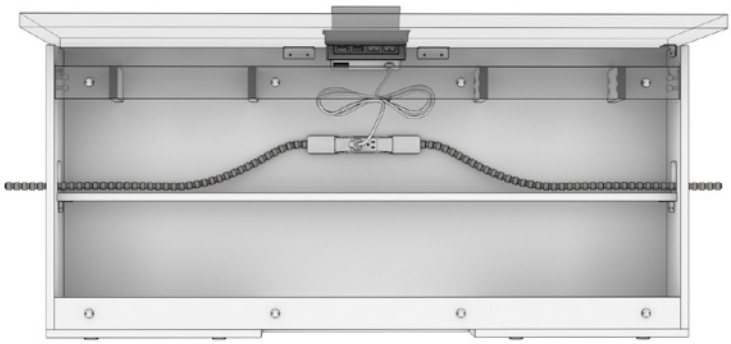

Understanding O-Shaped Tables

O-Shaped Tables come with a removable 30” wide section to access the inner portion of the table for presenting or cleaning. This section has hidden casters within the main table base and levelers on the user side of its end panel to allow for “wheel-barreling” (moving) out of the way. The 30" removable section will include LED lighting if ordered. If power is ordered, the 30" removable section will include a power unit on 150" or 180" wide tops. A power unit is not included when a 120" wide top is ordered due to spacing. There is an extra plug under the top next to the removable unit for disconnecting/connecting power and lighting.

VOU Power & Data Kits

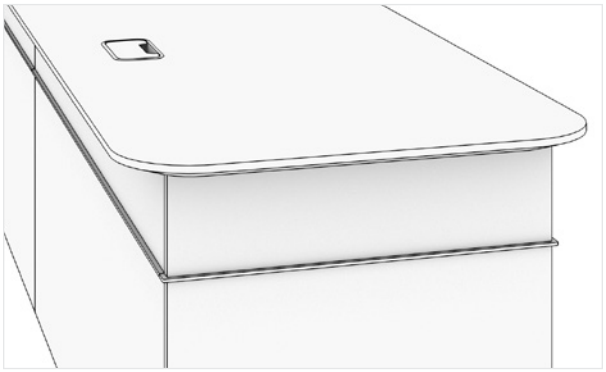

A variety of Enwork standard power/data units are available, including Ghost, Ellora and Alpha. These units are daisy chained together with a 2-circuit power system designed for each table size. Power systems are sold separately from the base and top. Infeeds and receptacles are included. Infeeds come with a 6-foot cord and can be placed anywhere under the table. For other power units (e.g. Satellite) there is a 2-circuit kit only option available and then power units would be ordered separately. For custom kits contact designteam@enwork.com

Understanding VOU

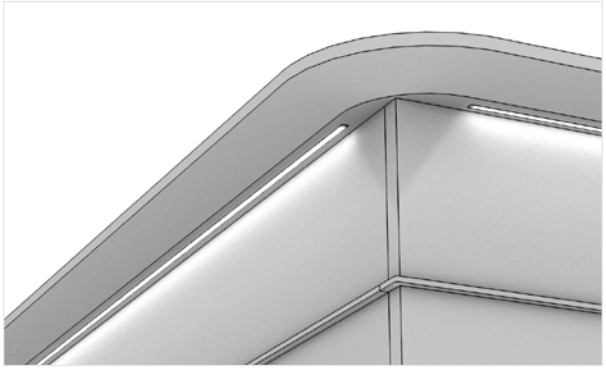

Design Option - Aluminum Trim

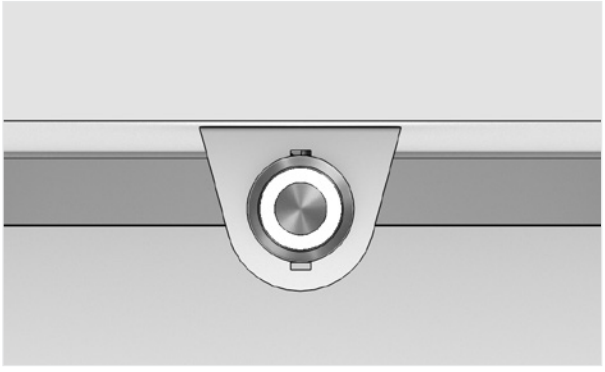

Create a sleek aesthetic with the optional painted horizontal aluminum trim located 6" beneath the table top. This trim wraps around the end panel to create a refined, executive look and feel to the table. Trim is available painted or as polished aluminum.

Design Option - LED Lighting

LED lighting adds energy to every meeting by accentuating the interior vertical walls of the table bases. Embedded in the bottom of the top and operated with a single button switch, this option is a winning way to make a great statement.

Zori® Straight T-Leg Flip Tables (Complete Table)

U.S. Patents No. DS875,449

Product Specifications:

> Angled leg flip tables nest in-line. Straight leg flip tables nest off-set. Nested, both leg styles have 7-1/2" between front of one table to front of the next table.
> Straight foot depth is approximately 18" for 18"D flip tables, 22" for 24"D flip tables, and 28" for 30"D flip tables.
> Table height is 29"H. For shorter height flip tables, put X in front and add $125 list. Shortest worksurface height is 21"H. For taller height flip tables, put XX in front and add $125 list. Maximum worksurface height is 42"H.
> Cable troughs are available. See page 184.
> Locking casters included.
> Flip tables include Top with 3mm edge or knife edge on user side.
> Polished finish columns have a black crossbeam. For all other paint colors, crossbeam is painted to match.
> Polished aluminum foot trim available for paint (non-polished) feet. See Step 4.

Ordering Information:

> A special 7"H hinged modesty panel, or a narrower width, are recommended for use with all angled and 30" and 36"D straight Zori flip bases to avoid potential paint scratches on the feet. Contact designteam@enwork.com for more details.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Choosing Power, Data, & Telecom Solutions

We make it easy to choose the right Power/Data assembly, assuring you have a highly functional yet cost effective solution. With a little bit of planning, empowering a table or a large training room can be simple – usually without the added complexity and expense of a technology integrator. Listed below are planning tips to help assure an impressive, productive installation.

Step 1 – Determine the number of power outlets needed.
Based on the size of the table and type of space, determine how many users might need power.

Tip: If the table will be used continuously for long periods of time, users will need to plug in their laptops. If so, a higher number of outlets may be needed.

Step 2 – Determine the number and type of datacom connections needed.
Which systems require physical connections? If the room or facility has a wireless network, fewer will be needed.

Step 3 – Determine which Power/Data unit best fits your requirements.
Use the Conference and Training/Teaming charts as well as the detailed assembly descriptions in this Price List to compare capabilities and features. Be sure to review the datacom options available for each assembly.

Data Options - Each unit is marked with an ▲ or ● to identify the category of datacom options available. Both types can meet most needs, but if you have diverse or unusual needs, assemblies with a ● have a wider variety of options available.

▲: Power/Data units in this category come standard with data openings and a Voice/Data Adapter kit. Adapters from the kit are used to install jacks or couplers (ordered separately from Enwork or supplied by the customer) into the data openings of the power/data unit. Voice/data options are punch down. Audio/video options are inline.

●: Power/Data units in this category come standard with datacom plate openings. Datacom plates must be ordered from Enwork or openings can be left empty. Datacom plates can be configured to include multiple voice, data, audio and video solutions. Voice/data options are punch down. Audio/video options are inline.

Tip: Two or more smaller units can provide better user access on longer conference tables. When using multiple units, it is often easier and more convenient if power cords can be combined. Some assemblies can be daisy-chained together under the table. In other cases a UL listed power strip under the top or hidden in a base becomes the consolidation point, reducing the number of cords that need to be routed to the floor.

Tip: Some units are one-sided, others are two-sided. For the same number of outlets, a single two-sided unit will be lower cost than two one-sided units.

Tip: Be sure you understand how power and cabling will be routed from the building into the space and to the table(s).

Tip: To select an appropriate in-feed, determine if power will be coming from an outlet or hard-wired to the building. Hardwiring also allows the possibility of multi-circuit power within a table or series of interconnected tables. Note that only some units can be hardwired.

Tip: If power needs to run from one table to the next, look for units that can be daisy-chained. If connected tables will be re-configured into alternate set-ups, then units with non-sequential daisy-chaining are often the best solution.

Step 4 – Determine the location and orientation of the Power/Data units in the table top.
The position of units in a table is important because it affects both access from different seating positions as well as the ease with which power and data can be routed from the building into the table.

Tip: For smaller tables, a single unit in the center is the most common solution. For tables longer than 96", multiple and/or two-sided units provide more convenient user access.

Tip: One-sided units typically open towards the end of a table. Two-sided units typically open towards the long sides of a table.

Tip: Multiple units are often spaced equally along the length of the table or positioned near the ends of the table, typically 20-24" in from the edge.

Tip: Positioning one or more units just next to legs or bases usually makes it easier to keep everything hidden. Placing assemblies directly over legs or bases requires special attention to assure there is no physical interference - contact designteam@enwork.com.

Tip: Refer to the Conference Table Power/Data Standard Cut-outs page in this Price List to see different positioning options.

Step 5 – Don't forget to order accessories
Cable Grippers, Cable Managers, and other accessories help keep all the wires and cables organized and out of sight. See page 270 for available options.

Notes

Zori® Freestanding Single and L-Shaped Screens

Product Specifications

US Patent: DS875,449

- Screens are made of extruded aluminum painted frames with Frosted Acrylic, acoustic, Frosted Acrylic w/ laminate lower, or acoustic w/ laminate lower panels.
- Lower laminate portion is 29"H. Laminate grain always runs horizontal.
- Mobile screens utilize Zori feet; non-mobile screens have low profile steel plates.
- Polished aluminum accent foot trim is available for painted (non-polished) feet on mobile screens. See Step 4.
- Single acrylic screens are available in clear or frosted acrylic, besides FRSAA60 and FRSAB60 due to acrylic sheet size. L-shaped screens are only available in frosted acrylic.

Ordering Information:

- **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

STEP 1 (Select Single Acrylic Screens Only)

(&) Acrylic Finish Suffix List

C Clear
F Frosted

Warning:
Acrylic screens scratch and scuff easily.
After removing protective film, immediately and carefully install the screen.

DO NOT remove protective film from acrylic screens, then stack them in a pile or against each other. Experience shows this will cause maring and scratching.

Private Office

Affinity™

Ligouri Private Office

Understanding Affinity

Introduction

Introducing Affinity, a private office furniture collection that seamlessly blends style and productivity. Embracing horizontal design cues, Affinity creates a sleek, inviting aesthetic through slim-profile solid aluminum shelving, integrated LED lighting, and optional accents. Its versatile components and range of sizes allow for effortless scaling, accommodating both modern and traditional configurations. Whether you seek a workspace that reflects your style or adapts to evolving needs, Affinity offers a harmonious balance of form and function.

Design Details

1. Affinity furniture rests on a recessed 1.25"H black plinth base, creating a light-scale floating furniture aesthetic.
2. Desks are available in Cantilevered, Overlay, and Traditional End Panel or Pedestal configurations, addressing everything from C-suites to reception stations within one synchronized collection.
3. Cantilevered Desk Shells feature a 45-degree mitered case construction, delivering clean lines by eliminating edge banding.
4. Common tops over storage eliminate visible seams. Optional quartz and back-painted glass toppers are ideal materials for elevating the aesthetic of any space.
5. Storage solutions empower designers to craft smart, functional spaces, featuring sophisticated appliance towers, printer storage, waste/recycling storage, and more.
6. Storage cases feature inset back panels for a clean, tight fit against drywall, while still allowing easy access to outlets. Access holes in the back of the cabinets ensure convenient cable management.
7. Individually specifiable worksurface, cabinet (cases), and drawer/door laminates make unique finish combinations possible.
8. Designers can define inspiring spaces with horizontal details in various ways: full-width sleek pulls on drawer fronts, customizable adjustable-height case laminates, optional slim-profile aluminum shelving with LED lighting, optional end-panel aluminum trim, and more.
9. Drawer body laminate matches the case, creating a seamless visual when drawers are open—a higher standard than the industry's common use of maple drawers.
10. Optional polished aluminum pulls, shelves, and end panel trim allow designers to make standout designs that cater to the most discerning tastes.

Key Features

1. Affinity features soft-close hinges and drawers (exception: Value Storage).
2. An industry-leading height-adjustability range of 26.5"/27" – 47.5" (depending on desk) accommodates workers of all heights.
3. Affinity comes standard at a height of 81". The overall height is determined by the storage tower. An optional height of 76" can be achieved with overhead storage and 37" wall panels above 24"H storage.
4. LED lighting is standard on aluminum shelves and optional on laminate shelves.
5. Affinity has an extensive statement of line, including:
    a. 24" and 29”H lower storage, each available in 20" and 24" depths, providing designers with complete flexibility in scale and functionality.
    b. Laminate and Tackboard Wall Panels are available with 1, 2, or 3 laminate/aluminum shelves. Affordable Glass Walls (36"W) are also available.
    c. Optional USB and outlets in the return area for personal devices.
    d. Robust cable management solutions with five options.

Dimmable LED Lighting

- LED lighting is dimmable, features a slim profile, and is fully recessed.
- LED lights come standard with aluminum shelves (excluding tall bookcases) and are optional for laminate shelves and overhead storage..
- The Light Driver and Switch Kit are ordered as a separate part number.
- Light color temperature is 3000K.

Locks

Locks are optional on most Affinity lower storage units, except those with sliding doors and side-access wardrobe storage. Locks are not available as standard on upper storage units.

Enwork uses black and nickel-colored locks, with the lock color defaulting to match the specified paint or laminate. Essentially, if black paint or black laminate is selected for a door/drawer storage front, a black trim ring and lock are installed. Otherwise, a nickel trim ring and lock core are used.

A set of lock cores per office should be ordered separately from furniture. Refer to Affinity Locks on page 382 and the complete list of default colors on page 18.

Thin-Profile Aluminum Shelving

Inspired by aeronautical design principles, Affinity redefines light-scale environments in a new way. Featuring solid aluminum shelves, this high-quality solution enables elegant design with soft radii and crisp end details. Low-profile LED lighting is fully integrated and recessed.

End Profile

Isometric View

Affinity aluminum shelving is 5/8" thick and 12" deep, available in widths from 24" to 42". Standard shelving comes with a textured paint finish, with an optional high-polished finish available to coordinate with polished aluminum hardware and trim.

Engineered to support up to 100 pounds, these shelves provide exceptional strength and durability without deflection.

Wall Panels

Wall panels are mounted to walls using cleats. The customer is responsible for providing the appropriate wall attachment fasteners.

Wall Panel Planning

Laminate and Fabric Wall Panel widths are available in 6" increments to align with desks, low storage, and overheads. Glass wall panels are available 36"W only. Corner applications are intended for wall panels on one side. For wall panels on two sides of a corner or custom sizes to fit your unique application, contact the Enwork Design Team.

Dimensions & Specifications

1" Thick

- Laminate Walls (3/4" thick laminate panel plus hanging cleat) with and without shelves.
- Fabric Walls with no shelves (3/4" thick fiberboard panel plus hanging cleat).

1.25" Thick

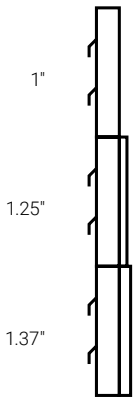

- Glass Walls (1/4" thick glass on 3/4" thick laminate panel plus hanging cleat).

1.37" Thick

- Fabric Walls with Shelves (3/4" thick laminate panel behind 3/8" thick fiberboard plus hanging cleat).

Optional Wall Flush Alignment Kits are available to shim 1" thick panels, aligning them flush with 1.37" thick walls on the user side. All walls feature 3/4" thick core panels mounted on cleats, making the protruding part of the core panel either the glass or fabric. This design looks intentional to most designers, but if a flush appearance is preferred, the Alignment Kit is recommended.

Please note that using the Alignment Kit will increase the space between the finished wall and the rear of the wall panel. This should be considered when planning office layouts, as the added space may not be preferable if visible through an interior door or window.

Affinity Storage vs. Affinity Value Storage

	Affinity Storage is designed to create inspiring return and credenza layouts. It has a variety of user features and design elements to create incredible office spaces. Key features include:	**Affinity Value Storage** is designed for use with simple fixed-height Desk Shells or for ganging together to create a credenza. Key features include:
1.	Soft-close hinges on doors.	Standard door hinges.
2.	Soft-close, bottom-mount drawer slides that are not visible from the side (exception: 29”H 2-high lateral and 29”H file/file pedestal have soft-close side-mount drawer slides).	Standard side-mount drawer slides.
3.	Thin-profile 3/4" common tops minimize top seams.	Used in Desk Shells or with 1.25" thick common top.
4.	1-1/4" thick recessed black plinths create an illusion of floating, light-scale furniture.	Does not include plinth.
5.	Drawer body laminate color matches the case laminate. Drawer bodies are 3/4" thick construction—most manufacturers use simple commodity maple (or similar) drawers that are only 1/2" thick.	Black drawer body laminate, 3/4" thick construction.
6.	Broad statement of line, including typical pieces along with open bookcases, sliding perforated steel doors, printer storage, trash storage units, and more.	Limited offering of pedestals, lateral files, bookcases, and double-door cabinets.
7.	Extensive dimensional choice: • Two heights – 24"H and 29"H • Two depths – 20"D and 24"D	Actual dimensions are 20"D x 27.75"H - for use inside Desk Shells.
8.	Choice of sleek or full-width sleek pulls, painted or polished.	Standard 4"W sleek pull; pulls on pedestals can be positioned left, center, or right based on aesthetic preference.
9.	Back panels are recessed 1" to keep storage tight to wall. Overlay cabinets, tech/lateral storage, trash pullouts, bookcases, and double door cabinets have access holes. Other cabinets require a field cut if needed. 	Flush back panels with no access holes.

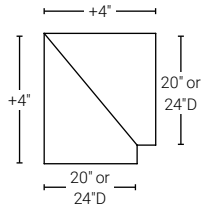

Understanding Affinity

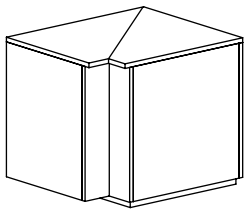

Creating a U-Shaped Office

Using Junctions – Turning the Corner with Same-Height Storage

Junctions are used to create a 90-degree turn by connecting Affinity Storage on the return and credenza areas of a "U" workstation. They are sized to correlate with the depth and height of the adjacent storage. The storage heights on each side should match – either 24"H or 29"H for both pieces.

Junctions include a plinth to match Affinity Storage and a mitered common top. They are oversized by 4" to allow for inner spacing, ensuring drawers on one side can be fully extended without interfering with the pull on the other side. Junctions are not for use with Value Storage.

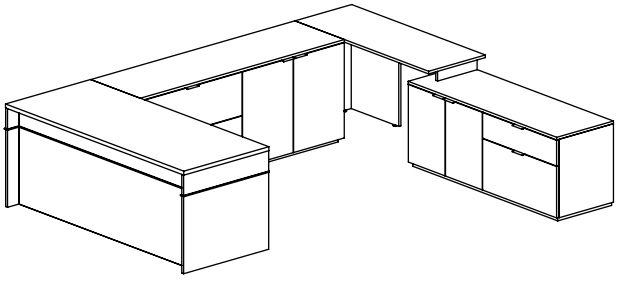

Using Layering Shells – Turning the Corner with Differing-Height Storage

Layering Shells are used to turn a 90-degree corner by transitioning Affinity Storage on the return side and overlaying credenza storage. They are sized to correlate with the depth and heights of the adjacent storage.

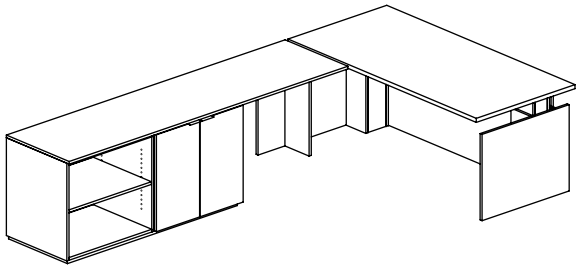

Layering Shells consist of an "L" end panel that sits beside the return storage and a vertical block stand-off to transition from 24"H to 29"H on the credenza side. Layering Shells are not for use with Value Storage.

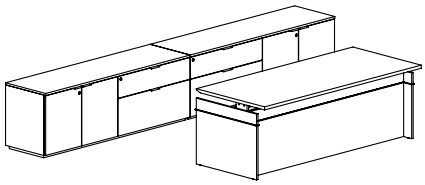

Using L-End Panels – Create Kneespace Adjacent to Main Desks

L-End Panels are utilized to create kneespace adjacent to main desks. This is achieved by specifying 29"H Affinity Storage and then adding in the Kneespace Package when ordering the Common Top and Plinth.

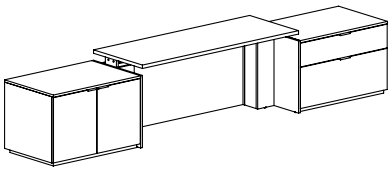

Example:
Qty 1 – BEH243029 - Double Door Cabinet, 30"W
Qty 1 – BEK243029 - Bookcase, 30"W
Qty 1 – BECP2496 - Common Top & Plinth Kit with Kneespace Package (Option Step 2)

Specifying Affinity Private Office

Step 1 - Primary Desk
- Determine configuration, size, and handing.
- Add optional power accessories and/or grommets.

Step 2 - Low Storage
- Add return/guest storage.
- Determine desired height(s), 24”H and/or 29”H.
- Determine depth(s), 20”D and/or 24”D.
- Select from a variety of storage configurations and widths.

Step 3 - Common Top and Plinth
- Calculate the required width by adding together widths of adjacent Low Storage Components.

Step 4 - Overhead Storage
- Choose from a variety of closed and open storage configurations.
- Specify LED Light Driver/Switch Kit if applicable.

Step 5 - Wall Panels
- Specify appropriate height, material, and shelves (if applicable), in coordination with Primary Desk, Low and Overhead Storage selections.
- Specify LED Light Driver/Switch Kit if applicable.

Step 6- Accessories
- Add optional items as required.

Product Specifications:
> Desk Shells are 29"H.
> Shells include a 1.25"thick rectangle HPL worksurface with 3mm edge.
> Shells include 3/4" thick end panels with levelers. Interior width available for storage is 1.5" less than nominal width (e.g. 58.5" available on 60"W desk).
> Value Storage for Shells can be found on page 369.
> 36"D top actual dimension is 34"D.
> Aluminum trim does not wrap into user kneespace to allow for tight fits with Value Storage.
> 30"D and 36"D back panels are inset 4" from rear of end panel. 24"D units have flush back panels.
> 24"D desks have 24"D end panels, 30"D desks have 30"D end panels, 36"D desks have 30"D end panels (4" overhang on guest side).
> See Understanding Affinity for additional details.

Affinity L-Junctions and End Panels

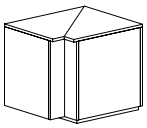

Product Specifications:

- L-Junctions include a plinth, cabinet base and top for making a 90-degree "U" configuration. Actual depth and width dimensions are 4" bigger than nominal to allow for pull clearance. See Understanding Affinity for more details.
- Only one side of an L-Junction can utilize a standard 24"H or 28"H wall panel. To have both sides utilize a wall panel, contact designteam@enwork.com.
- Plinths on L-Junctions are undersized to allow for cable routing along the floor behind the L-junction.
- Layering Shells are used for height changes when making a 90 degree "U" configuration. For example when going from a 29"H return to 24"H back credenza storage. Layering Shells are non-handed.
- L-End Panels are used to support worksurfaces as necessary. One application is when kneespace is needed by return storage. One end of worksurface can be supported by L-end panel while the opposite end is supported by storage. L-End Panels do not have an aluminum trim option.
- L-Junctions and L-End Panels do not work with Value Storage.

Affinity Reception Desks

Product Specifications:

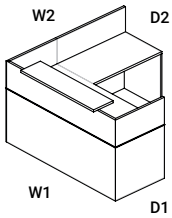

> Main Desk ships assembled (except for the transaction top). Returns do not ship assembled.
> Transaction worksurfaces are 12"D and available in Flat and 90-degree Overlay configurations (reference drawings). Finishes are laminate, quartz or solid surface. Non-ADA transaction width is 24" shorter than wall width (inset 12" from each end). For example: a 72"W Reception Desk Shell has a 48"W Transaction surface.
> For ADA Reception Desks, 72"W Units have a 40"W Flat or 30"W overlay transaction top, 84"W units have a 46"W flat or 36"W overlay transaction top, and 96"W units have a 64"W flat or 54"W overlay transaction top.
> Laminate 90-degree overlay transaction ships assembled.
> Wall height is 42"with horizontal grain direction. Panel-to-panel grain direction is not perfectly matched between panels.
> Storage sold separately. Utilize Affinity Value Storage for use under worksurfaces. See page 369.
> Main worksurface is 30"D. Return worksurfaces are 24"D.
> Main worksurface includes grommet cutouts located in each rear corner (2 total).
> ADA main worksurface includes 1 grommet cutout, located in the rear corner with 42"H walls.
> Optional trim height is 29"H to align with worksurface.
> For custom Reception Desks, Enwork recommends contacting your local millwork company.

Product Specifications:

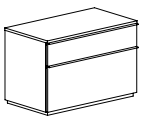

> Drawer body laminate matches case for premium aesthetic.
> Cabinet drawers are available with a 4" or full-width sleek pull. Double Door cabinets are only available with 4" sleek pull.
> Cabinet back panel is recessed 1" to keep storage tight to wall allowing cords to plug into outlets. 2" x 4" rear access hole is provided on tech/lateral cabinets, trash pullouts, bookcases, and double door cabinets. Plinths are undersized to allow cable routing behind adjacent cabinets.
> Cabinets are designed to be ganged together (2+ units) with a common top and plinth (ordered separately). Later-lateral cabinets and file-file pedestals always include a drawer interlock system for safety. Lateral-lateral cabinets also include a wall anchor kit. For other freestanding single storage units that contain multiple drawers (e.g. box-lateral and box-box-file ped) add an "F" to the end of the part number and add +$120 list. This will add a drawer interlock system for safety so that both drawers won't open at the same time, causing tipping.
> Bookcases include (1) adjustable shelf.
> Lateral and Pedestal file drawer includes a front-to-back letter-sized pendaflex rail system.
> Tech drawer includes a dense foam bottom, steel divider, venting for laptop docking and user power/data access (1 receptacle and an opening for a telecom plate that is ordered separately - see page 268).
> 24"H Box/Lateral File and Tech/Lateral file drawers include concealed soft-close undermount slides. 29"H Lateral/Lateral Drawer Cabinet, and 29"H File/File Pedestals are the exception, and include soft-close side-mount slides.
> Doors have soft-close hinges
> Storage cabinets ship fully assembled.
> See Understanding Affinity for additional details.

Affinity Value Storage for Shells

Product Specifications:

> Value Storage fits inside Desk Shells. Tip: Interior width of Desks Shells are 1.5" less than overall width (e.g. 58.5" interior on a 60"W unit) due to two 3/4" thick end panels.
> 2+ units of Value Storage can combined to form a credenza or return utilizing the tops below. Single, stand-alone Value Lateral Files and Pedestals may not be freestanding due to a lack of anti-tip interlock.
> Value Storage differs from standard Affinity storage by having no plinth to create a light-scale, floating furniture aesthetic.
> Value Storage has standard side-mount drawer slides (standard Affinity has soft close drawers and doors with bottom cradle slides for improved aesthetic).
> Value Storage has black drawer bodies (standard Affinity has matching laminate drawer bodies).
> Value Storage is 20"D and 27.75"H to work with 29"H shells.
> Value Peds are 16"W and include Pendaflex rails in file drawers.
> Value Laterals include Pendaflex rails.
> Value Storage is not available with the full sleek pull, just the standard 4" sleek pull.
> Value Storage is not available with polished aluminum pulls.
> Value Storage has one laminate finish. Door and drawer fronts are not each specifiable like regular Affinity.
> Value Storage tops are 1-1/4" laminate tops.

Product Specifications:

> Two heights are available to achieve an overall height of 81" when used over 29"H storage components: 38"H with overhead storage, and 57"H with no overhead storage.
> 28"W panels are for use with Affinity L-Junctions. Only one side of an L-Junction can utilize a standard wall panel. To have both sides of an L-Junction utilize a wall panel, contact designteam@enwork.com.
> Glass wall panels are 1/4" thick, annealed, and back-painted white. Glass is supported by a 3/4" thick support panel.
> Fabric tackboards 60"W and greater require railroading the fabric horizontally.
> Wall panels are mounted to the wall with cleats. Wall attachment hardware for cleats is not included.
> 18"–60"W Laminate Wall Panel grain direction is vertical. 66"–72"W Laminate Wall Panel grain direction is horizontal.
> LED lighting is included with aluminum shelves and is optional for laminate shelves. Driver/Switch Kit is specified separately in BOTH situations.
> Aluminum shelves available 18-42" wide only.
> Laminate shelves hold 50 pounds. Aluminum shelves hold 100 pounds.
> See Understanding Affinity for additional details.

Ordering Information:

> For LED lighting, drivers/switch kit is specified separately. See page 377.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Cayman

Introduction

Cayman redefines comfort and elegance in the private office by creating an environment that will delight its users. Cayman is the industry-leading private office solution in the following ways:

1. Cutting Edge Design
2. Creature Comforts
3. A Facility Manager's Dream

Let's explore them all further:

Cutting Edge Design

Cayman leads the way with incredible aesthetic features:

- Clean, crisp lines
- Cantilevered work surfaces
- Elegantly shaped solid aluminum shelving with optional integrated low-profile recessed LED lighting
- Mixed materials
- Single slab floating plinth base
- Completely hidden and integrated vertical and horizontal cable management
- Easy-access user power and technology storage
- Collaboration friendly with unique top shapes
- Add-On Modules are specified by the inch for uniquely sized office footprints that fit perfectly within walls
- Multi-material walls that are perfectly flush
- Drawer body laminate matches case laminate.

Creature Comforts

Cayman brings the comforts of home into the workplace.
These features support high-performing teams and executives:

- Fully integrated home office at work. Every item has its place:
- Printer
- Microwave
- Coffee Maker
- Refrigerator
- Sound Bar
- Large Monitors
- Phones
- Numerous perfectly placed electrical outlets
- One button dimmable LED lighting
- A place for all your stuff… shoes, food, coats and more
- Soft close drawers and doors for an exceptional feel!

A Facility Manager's Dream

- Reconfigure with ease. Cayman is standard with its own structure system so it does not hang on drywall. Cayman is minimally tethered to drywall to counteract cantilevered top loads.
- Arrives sub-assembled, installs in less than an hour per office depending on the typical. Reference the 3-minute Cayman Installation Video on the Cayman home page at enwork.com/products/cayman.
- Easy to specify offices with popular pre-configured typicals using only one part number!
- Turnkey your office with one-stop shopping for high-end appliances.

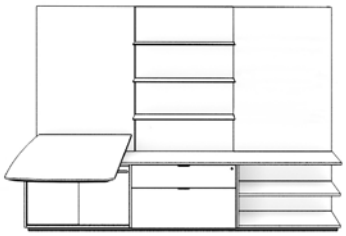

Understanding Cayman for Specification

Cayman is a modular independent wall based furniture product that is available in two heights: 66”H Standard height and 80”H Executive height. Cayman at its core is an incredible private office solution that is also a great fit for supporting high performing teams in video conference and collaboration spaces.

Cayman is easily specified by selecting one of the following **10 typicals:**

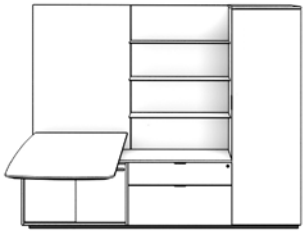

Typical 1
Base Office A

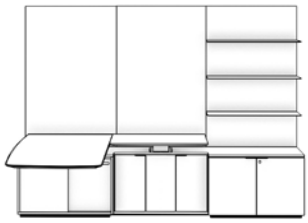

Typical 2
Base Office A w/ Add-On Module

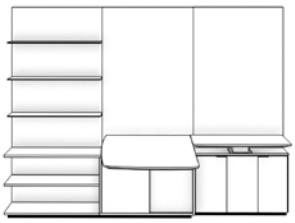

Typical 3
Base Office A w/ Add-On Module

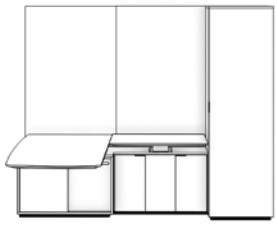

Typical 4
Base Office A w/ Tower

Typical 5
Base Office B w/ Add-On Module

Typical 6
Base Office B w/ Add-On Module

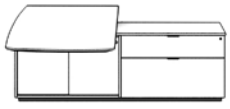

Typical 7
Base Office B w/ Tower

Typical 8
Base Office A w/ Add-On Module
and Tower

Typical 9
Base Office B w/ Add-On Module and Tower
(w/ Optional Shelves)

Typical 10
Base Office A
(wIthout Work Wall)

Cayman

Each typical consists of the following modules:

- Base Office A or B
- Optional Tower Modules
- Optional Add-On Modules

Let's explore each...

Base Offices

Base Office A and B are 72" wide consisting of two 36" wide walls and cabinets. Included in both are a 66" or 72"W cantilevered worksurface (fixed height or electric height-adjustable with a range of 30" – 45" via programmable switch), Beneath the cantilevered worksurface is a sliding acrylic or laminate door cabinet with shelves and the worksurface vertical support.
See below:

Base Office A
(Shelf quantity varies by height)

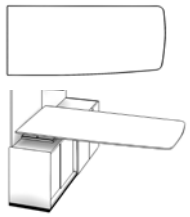

Base Office B

Base Office A has cabinet options on the return while Base Office B has an electric height-adjustable worksurface return (24"D x 36"-60" W) with a height range of 30"-45" and includes a programmable handset. If paired with an electric height adjustable cantilevered worksurface, then both surfaces utilize one programmable switch.

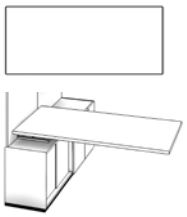

Cantilevered Worksurface

The Cayman shape worksurface is designed for collaboration by using gentle curves and radiused corners along the guest edges to create an approachable and comfortable aesthetic. All worksurfaces include a cantilevered arm support underneath the top with a removable cable access cover. Cayman-Shape worksurfaces have a knife edge. Rectangle and Wedge worksurfaces have 3mm edge. Back wall edge of all tops are flat to accommodate a Dean Clamp on unit (sold separately). Worksurfaces support 100 pound loads while moving up and down. 18" of the 72" width is over the cabinet and 54" is beyond the cabinet with open kneespace.

There are three top and four cable management options for cantilevered private office worksurfaces:

Option 1 - Cayman-Shape
34"D x 66"–72"W
(with knife edge)

Option 2 and 3 - Rectangle
30"D x 66"–72"W or 34"D x 66"–72"W
(with 3mm edge)

There are two options for conferencing tops:

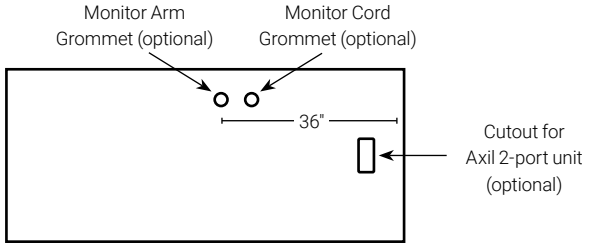

Cayman-Shape Conference
34"D x 72"W (with knife edge)

Wedge Conference
34"/27"D x 72"W (with 3mm edge)

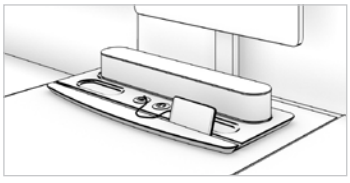

Cable Management Options

- No Grommet
- One Grommet for Monitor Cords
- Two Grommets (Monitor Arm and Monitor Cord)
- Cutout for Axil 2-port unit (ordered separately)

Utility Tray

The optional Utility Tray naturally defines and supports a collaboration space. The tray is a beautifully sculpted and painted MDF product that includes ultra-slim profile power (power outlet and USB A+C), a dedicated sound bar and marker storage area along with phone holding capability (sound bar not included). The tray is placed at the wall end of the cantilevered worksurface. White trays come with a white power module. All other paint colors come with a black power module.

Base Office Walls

Wall choices above the cantilevered worksurface and return include: laminate, tackable fabric or glass markerboards (non-magnetic). Open shelving and closed Overhead Cabinet options are also available.

Base Module Return Cabinets

Return cabinets include a tech drawer (box drawer) with a dense foam bottom, steel divider, venting for laptop docking and user power/data access (1 receptacle and an opening for a telecom plate that is ordered separately — see page 268).

Beneath the tech drawer there are two choices: Lateral file drawer for front-to-back letter-sized pendaflex file storage or a double door for microwave or object storage.

Microwave Garage includes power outlet.
Space is 34”W x 19”D x 11.75”H.

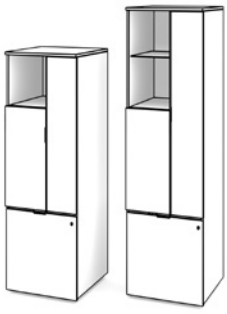

Tower Modules

There are three types of Tower Modules:

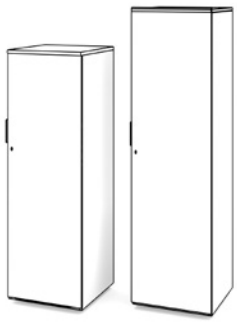

66”H RH 80”H RH

Side-Access Wardrobe Towers w/ Appliance and Printer Garages

66”H RH 80”H RH

Front-Access Wardrobe Towers w/ Appliance and Printer Garages

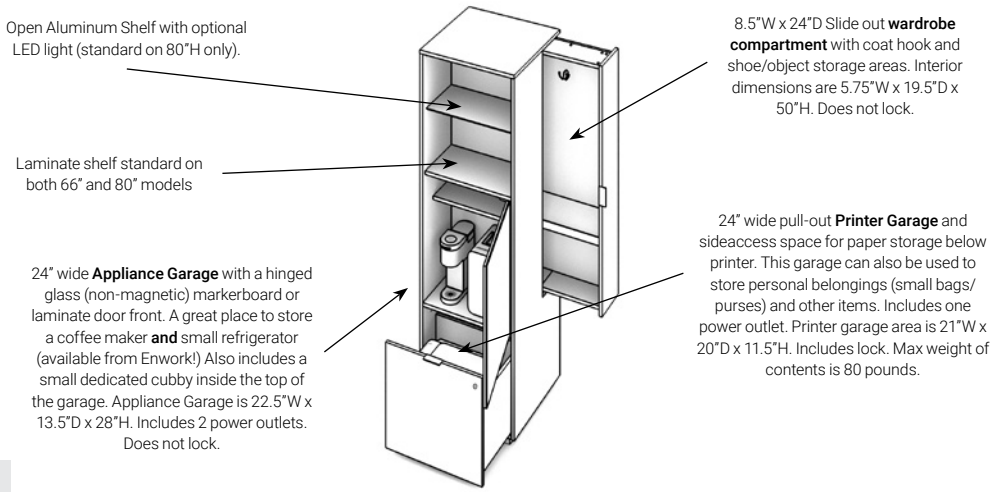

66”H RH 80”H RH

Single Door Wardrobe Towers w/ Adjustable Shelves

Most towers are 24”W x 24”D and available in Standard (66”H) and Executive (80”H) heights. Single Door towers are also available in 18"W x 24"D. Towers are available in right hand and left hand versions.

Add-On Modules

Like the name implies, Add-On Modules are added on to Base Office Modules to create typicals. There is a common recessed black plinth under the cabinets to create a floating aesthetic. There is also a common top above lower storage to hide cabinet seams.

Add-On Modules have the ability to be ordered **by the inch** to help fit any space! They vary in width from 24" to 36". Wall height is 66" or 80"H. Cabinet depths (excluding towers) are 20"D. Complete wall depth is 24"D.

Specifying Add-On Module walls by the inch in typicals is easy through CET. Simply click and drag to the desired dimension.

By the inch

Add-On Module Walls are available in laminate, tackable fabric or white back-painted glass markerboards with different combinations of open shelving and closed Overhead Cabinets available. Note: Back-painted white glass markerboards are only available in 36"widths as standard. A **portion** of available options are shown below:

Add-On Module Cabinets are available in open shelf, double door, printer garage, trash, and tech/lateral drawer configurations. Double door cabinets come with adjustable shelves.

Thin Profile Aluminum Shelving

Inspired by aeronautical design principals, Cayman defines light scale environments in a new way. With solid aluminum shelves, this high-quality solution allows us to beautifully design with gentle radii and crisp solid end details. Optional low profile LED lighting is fully integrated and recessed.

End Profile

Isometric View

Cayman aluminum shelving is only 5/8" thick and 12" deep. Shelving is available in multiple widths, 24-36" wide. It is also available in our "by-the-inch" widthflexible Add-On Modules. 25", 26", 27", 28" and 29" shelves are the same price as a 30" shelf and 31", 32", 33", 34" and 35" shelves are the same price as a 36" shelf.

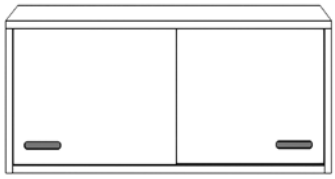

Shelving is textured paint as standard. Optional high polished finish is available. See Cayman Accessories.

These shelves are rated up to 100 pounds through innovative engineering. You don't have to worry about shelves deflecting for any reason. Simply the best.

Overhead Storage Cabinets

Cayman Overhead Storage Cabinets are 12"D x 13.6"H x 24–36" wide. They are part of our "by-the-inch" Add-On Modules for width flexibility. 25", 26", 27", 28" and 29" units are the same price as a 30" cabinet and 31", 32", 33", 34" and 35" units are the same price as a 36" cabinet.

Cabinets have laminate sides and top/bottom. Sliding doors are available in frosted acrylic or laminate.

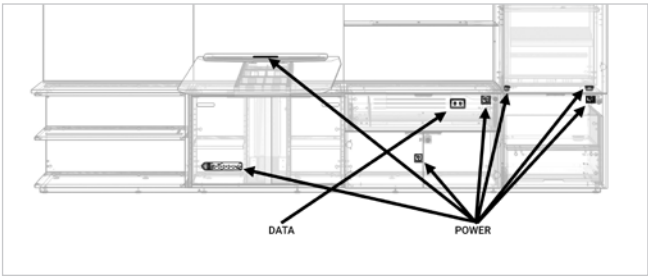

Power and Data

Cayman typicals come with the following electrical solutions:

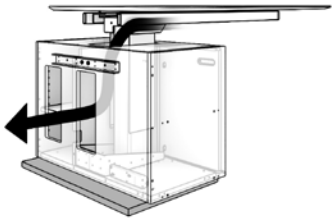

- Single circuit power system via plug strips that are plugged into the wall, enter through the cantilever top cabinet and flow through the backs of cabinets.
- Included:
  - Two 6-receptacle 15 amp plug strips with 6 foot power cords. One placed in cantilever top cabinet and one user configurable. Plug Strip can go five feet either direction from the center of the cantilevered top cabinet to reach a wall outlet. If wall outlets are further away than five feet then customer provided cord extension is required.
  - One receptacle and telecom plate data cutout with blank plate in Technology Drawer. Telecom plates sold separately. See page 268.
  - Two receptacles in Appliance Garage of Side-Access Tower.
  - One receptacle in Appliance garage of Front-Access Tower and Single Door Tower.
  - One receptacle in Printer Garage.
  - One receptacle in the Microwave Garage (double doors below technology drawer in return cabinet).
  - Two receptacles in Utility Tray (optional).
- Chicago Code Power is available as an additional kit.
- Cayman power components are individually UL listed.

See Drawing:

Cable Management

Cayman tops have a trough with removable wire cover beneath the top. Cords run vertically down to the cabinets inside of a steel chase that also houses the column. Once inside the cabinets cables run through the upper back portion inside the cabinet. Power cords exit the worksurface cabinet and plug into wall outlets.

Cayman

Dimmable LED Lighting

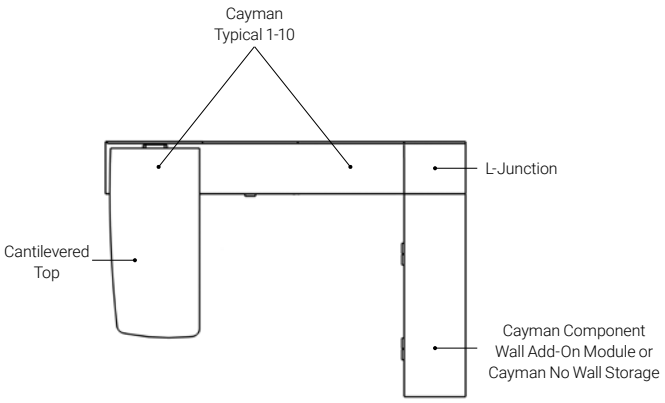

If selected, LED lights are located in cubby areas of Cayman Typicals. All lights are connected by wire to the lighting driver. Lights are activated by a switch, and are fully dimmable. Light switch is preinstalled inside the cantilever top cabinet. Lights are 22”W x 0.375”D slim profile and fully recessed.

Specific Locations of Lights

- Tower Module
  - Located underneath the top roof on front and side-access towers.
  - Located underneath aluminum shelf on 80”H side-access towers.
- Base Module Return Walls and Add-On Wallst
  - Lights are located underneath each Overhead Cabinet or aluminum shelf
- Open Laminate Shelf Lower Cabinets
  - Contains two lights, one for each cubby space.

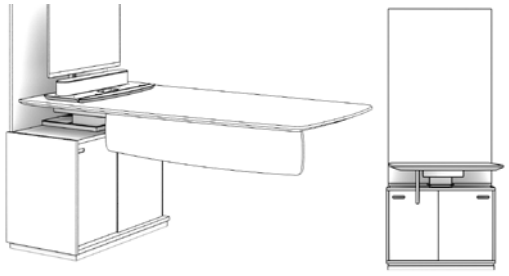

Junctions

Junctions are used to create a 90-degree application between a Cayman typical and Cayman Component Wall Add-On Modules or Cayman No Wall Storage Components to form a “U” office configuration.

Modesty Panels

Optional modesty panels are available in ¼” acrylic or ¾” laminate. Modesty panel actual dimensions are 9”H x 48” W (Cayman tops are 72”W) and are located off-center in both directions as follows:

Creature Comforts

Enwork makes it easy to provide a fully outfitted office on Day 1 with one-stop ordering of creature comfort products. Get a mini refrigerator, microwave, coffee machine and sound bar delivered with each office. For the latest versions of these products consult enwork.com/products/cayman

Below is the available space inside each garage:

- Appliance Garage in Side-Access Wardrobe Tower (holds mini refrigerator and coffee maker) – 22.5”W x 13.5”D x 28”H
- Appliance Garage in Front-Access Wardrobe Tower (can hold 1 appliance) - 14.5”W x 17.5”D x 28”H
- Printer Garage in Side and Front-Access Wardrobe Towers (printer not sold by Enwork) – 21”W x 20”D x 11.5”H for the printer and 21”W x 19.5”D x 6”H for the paper storage area.
- Microwave Garage (behind double door space of return cabinet in Base Office A) – 24”W x 19”D x 11.75”H.

Monitor Mounts

The Cayman monitor mount is color-matched and designed to integrate seamlessly with the Cayman cantilever. It is installed at the wall end of the cantilevered top. Monitor mounts include adjustments for tilt and height. Cayman monitor mounts can accommodate monitors up to 40”.

Conference Room Typicals

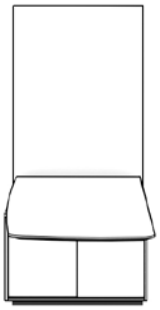

A variety of typicals will create highly functional, user-friendly videoconferencing and meeting rooms. Perfect for Zoom and Teams calls.

Cayman

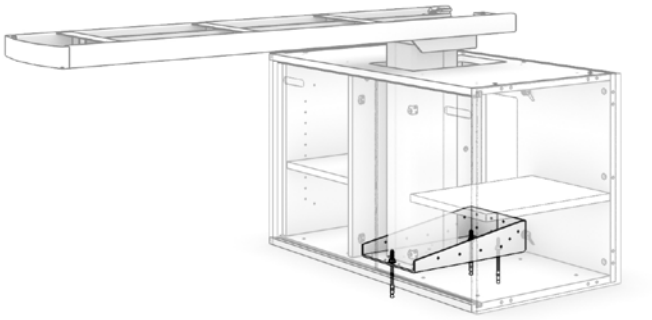

Installation Overview

The Cayman wall system is freestanding with its own structure (vertical posts, end trims, common plinth/top – see diagram). This structure must be tethered to a building wall stud via the Cayman wall tether bracket (see diagram). Cayman **cannot** be attached to a demountable wall. For this situation Cayman must be bolted to a 2" thick concrete floor with bolts in the bottom of the worksurface cabinet. The Cayman floor attachment hardware kit is sold separately.

Wall Stud Attachment

Floor Attachment

All Cayman typicals (minus LED lighting) install in less than one hour per office once product is staged at the install location. **Reference the 3-minute Cayman Installation Video on the Cayman home page at enwork.com/products/cayman.** Many of the components are sub-assembled at Enwork prior to shipment in order to achieve this level of installation timing. Below is a list of Typical 8 (as an example) shipping unit components that will be received at the job site from Enwork:

1. Lower Cabinet Assembly for Cantilevered Worksurface (includes vertical columns)
2. Lower Cabinet for the Add-On-module
3. Lower Return Cabinet Assembly
4. Storage Tower
5. Wall Assembly – Wksf Wall (includes pre-assembled shelves if specified)
6. Wall Assembly – Add-On module wall (includes pre-assembled shelves if specified)
7. Wall Assembly – Return wall (includes pre-assembled shelves if specified)
8. Common Plinth (goes under lower cabinets)
9. Common Top (goes above lower cabinets)
10. Cantilevered Top
11. Cantilevered Top Support Weldment and Wire Access Cover (for attachment to vertical column)
12. Vertical Posts for Wall Ganging– qty 4
13. Tether Bracket
14. Miscellaneous Products
    a. Power Strips – qty 2
    b. Installation Hardware
15. Optional Products that Ship Separately (IF SPECIFIED)
    a. Modesty Panel for Cantilevered Top
    b. LED lighting
    c. Utility Tray
    d. Overhead Cabinets
    e. Appliances

Understanding Ligouri Private Office

Introduction

Blending nature and mixed materials sets the tone for engaging collaboration and high-level ideation. Ligouri Private Office thoughtfully integrates the beauty of hardwood into laminate private office environments. Sculpted aluminum coupled with slim profile LED lighting, productive display walls, and clever power/data capabilities create forward-thinking yet comfortable, relaxed environments for work.

Natural Materials and Modern Appeal Create a Welcoming Design

Ligouri makes a powerful statement aesthetically:

- Beautifully carved walnut, oak, and ash legs combined with aluminum detailing and frames form a floating top, setting the tone for an elegant art form.
- Overlay Desks and Cabinets interplay to create a light, welcoming blend of work and storage layers.
- Inset back panels on Overlay Cabinets allow desks to be placed tight to the wall for a crisp look while accommodating plug heads for wall outlets.
- Wraparound frame details are elegant and purposeful.
- Thin profile polished aluminum display shelves create an appealing visual statement. (optional)
- Thin profile quartz and glass cabinet tops are available to achieve a refined look.

Thoughtfully Appointed

Ligouri brings incredible ease and productivity to your fingertips:

- The Ligouri Wire Chase brings power, USB connections, and user cable management to the top surface, beneath the top (mid-level), and into the cabinetry.
- Optional electric height-adjustable returns and power/USB connections in return tops give users flexibility.
- User-reconfigurable wardrobe storage cabinets allow for storage in any configuration.
- Soft-close doors and drawers give Ligouri a refined feel.

Easy Installation

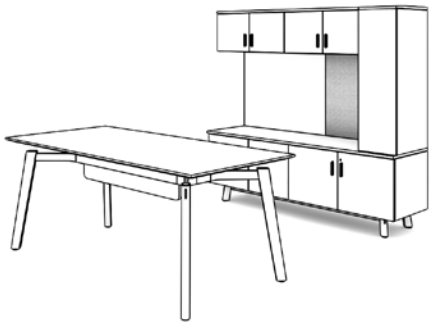

- Enwork's innovative *Quick Level Adjustment System* ensures simple and precise installation of overhead cabinets. With adjustment up to +/- 1/4", it's easy to wrap up a project and quickly move onto the next install.
- All cabinets and frames come fully assembled.
- Cords and connections route easily through recessed back panels, cable passthroughs in cabinet walls, and intentional back cabinet cutouts.

Understanding Ligouri Private Office for Specification

The primary desk and storage components are available in two different space-planning configurations: Overlay Desks or Freestanding Desks.

Overlay Desks

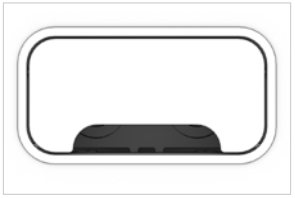

Freestanding Desks

Ligouri Overlay Desks

Overlay Applications consist of an Overlay Desk and an Overlay Cabinet (specified separately). The Overlay Desk sits over the Overlay Cabinet to create a floating L-shaped desk configuration that minimizes table legs while providing unique cable management opportunities.

The Wire Chase features a wraparound aluminum frame that supports the floating top. There are two locations within the chase to mount power and/or USB-A+C outlets (ordered separately) for quick connections under the flip-top grommet (e.g. a phone charger). A removable magnetic access door located mid-level, below the worksurface but above the cabinet, allows cords to travel into the Wire Chase from underneath the table, and for access to power small accessories that might be placed on the cabinet return, such as a small fan.

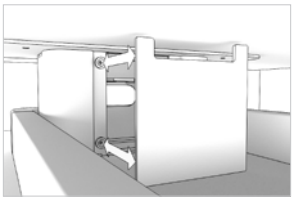

The power unit Alpha has the same aesthetic as the Wire Chase. Alpha can be specified in other furniture for a cohesive look.

Interior (shown: outlet, USB A+C, cable passthrough)

Mid-level Magnetic Removable Door

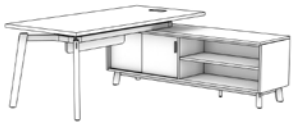

Overlay Cabinets

Overlay Cabinets include a 20"D x 36"W case with adjustable shelf beneath the main desk and either hinged laminate doors or acrylic sliding doors (exception: height-adjustable returns are 18"D to maximize kneespace). A variety of locking 30–60" wide storage elements are available within the return, bringing the total cabinet width to 66–96" wide. Wire routing holes are located in the back of the worksurface case and interior side walls. The case also contains a 2" deep recessed back panel dedicated to keeping the desk tight to the wall when mounting plug strips and wall-inserted plug heads. Cabinets come with 3/4" thick laminate tops unless 1/4" thick low-profile Designer Tops (glass and quartz) are specified.

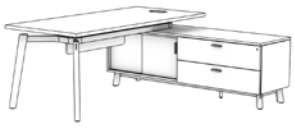

Overlay cabinet returns are available in seven different configurations:

Double Door

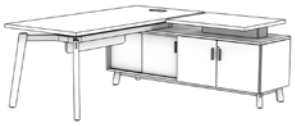

Bookcase

Two Box Drawers

Cubby and Lateral Drawer (one drawer front for both)

Height-Adjustable Return (28.5–44.5")

Cubby/File Ped (one common front) and Double Door

Cubby/File (one common front) and Bookcase

Height-Adjustable Return

Height-adjustable returns are 27"D and vary from 30"–60"W. Note: Kneespace is 10.5" deep. Case is 18" deep instead of 20". 54" and 60"W returns (90" and 96"W Overlay Cabinet) have 2 doors with open shelving for storage. 30"–40"W (66" and 78" Overlay Cabinet) have no underneath storage.

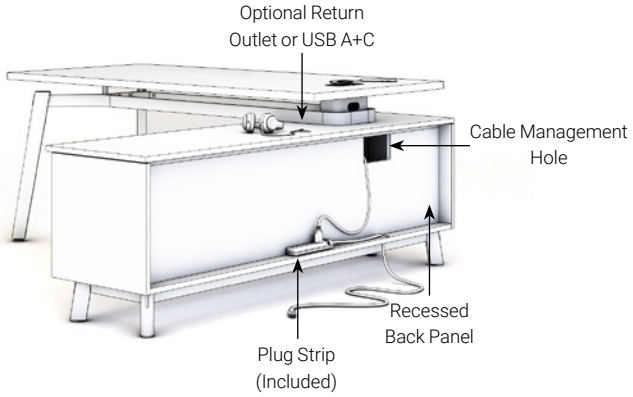

36"W Return (72"W Overlay Cabinet)

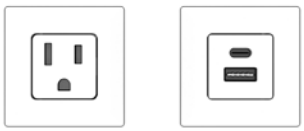

60"W Return (96"W Overlay Cabinet)

Understanding Ligouri Private Office

Power Routing

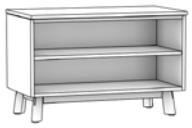

All overlay cabinet return configurations allow for an optional power or USB-A+C outlet in the surface. Available by ordering the access hole in the cabinet return surface. Power and USB-A+C outlets are ordered separately.

Overhead & Stack-On Cabinets

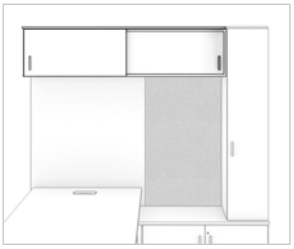

Overhead cabinet options are wall-mounted with cleats. Cabinets contain the innovative Enwork *Quick Level Adjustment System.* This system ensures quick and precise cabinet-to-cabinet leveling adjustment while hanging on the wall utilizing an Allen wrench and/or power tools. Overhead Cabinets do not lock (below worksurface cabinets lock).

Specifying Overall Height

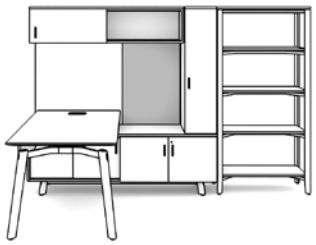

Ligouri Private Office is available in four heights: 24"/29"H, 66"H, 72"H, and 80"H

24"/29"H
29"H Overlay Desk and 24"H Cabinet

66"H
Requires: 14"H Overhead Cabinets, matching 66"H Stack-On Storage, and/or Display Area Components.

72"H
Requires: 14"H Overhead Cabinets, matching 72" Stack-On Storage, and/or Display Area Compnenets. Tip: 72"H configuration is ideal for matching up with Ligouri Freestanding Shelving (bookcases).

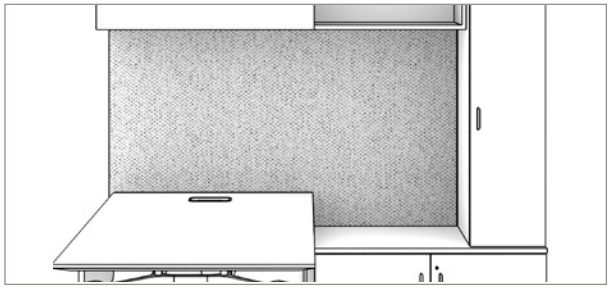

80"H
Requires: 14" or 18"H Overhead Cabinets with matching Stack-On Storage heights. Note: 18"H Overhead Cabinets include additional adjustable shelving.

Understanding Ligouri Private Office

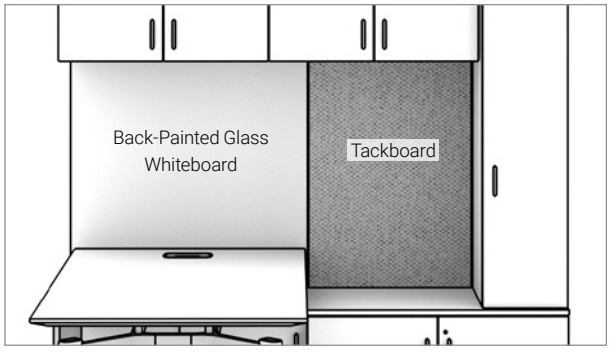

Display Area - Single Tackboards

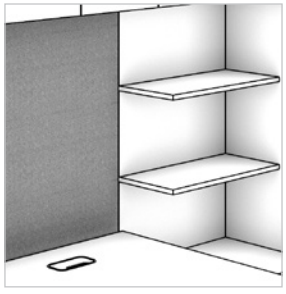

Single Fabric Tackboards are available to fill in the entire wall space above the Overlay or Freestanding Cabinet. They attach via wall cleat.

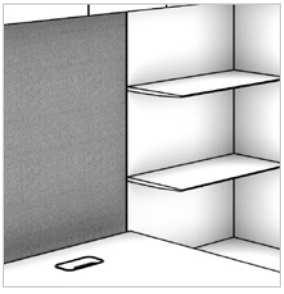

Display Area - Segmented

Segmented Display Areas also fill the entire wall space above the Overlay or Freestanding Cabinet. Selections include wall-mounted tackboards, back-painted glass whiteboards, laminate shelving, and laminate with thin profile aluminum shelves. Glass whiteboards are available in 36" widths only. All attach via wall cleat.

Thoughtstarter:
Display Areas are also available in 66" and 80"H with no overhead.

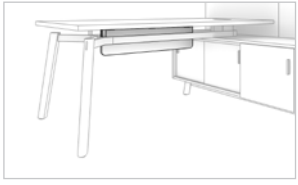

Dimmable LED Lighting

LED lights are located underneath overhead storage and display area shelving (except for 18"W) if selected. All lights connect by wire to the lighting driver and are activated by a switch. The Light Driver and Switch Kit are ordered as a separate part number. Lights are 22.75"W x 0.375"D, slim profile, and fully recessed.

Modesty Panels

Laminate modesty panels are an optional selection for Overlay and Freestanding Desks. To ensure guest kneespace clearance, modesty panels are recessed 14" from the guest edge (inside of frame).

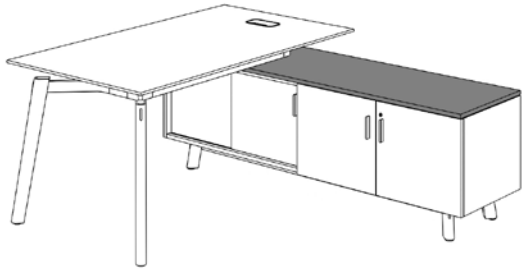

Overlay Desk & Cabinet

Freestanding Desk

Cabinet Finishes

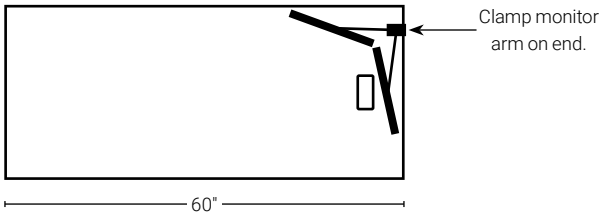

Cabinet cases/doors/drawer fronts finishes are specified together. Storage cabinet tops are specified separately, giving an option for an accent color.

Creating a U-shaped Office With Overlay Cabinet

Ligouri Credenza Layering Shells create U-shaped workstations when used in conjunction with Overlay Cabinets and Overlay Return Stacker surfaces. Layering Shells have a 20"D x 20"W L-shaped thin-profile end panel on one side and two post feet on the opposite end. These shells are designed to layer over a freestanding credenza.

Product Specifications:

> Ligouri legs are clear coated, stained, or painted solid wood with precision aluminum detailing and top trim. (The aluminum finish matches the frame.)
> Legs are tapered D-shape. Leg profile dimension is 1.75"D x 2.75"W at thickest point (top of leg).
> Legs ship assembled, frames ship unassembled.
> Frame is painted or polished aluminum.
> Desks include top and base.
> The Overlay Desk base has two legs on one end, while the opposite side sits on the Overlay Cabinet, supported by the steel wire chase (included).
> Desk is 29.75"H with levelers.
> Includes two PDGR cable managers.
> The Wire Chase allows for cables to pass from the top surface into the cabinet. Additionally, two openings under the flip-top grommet allow for power and/or USB-A+C outlets (ordered separately). The side of the chase, beneath the top but above the cabinet, features a scalloped magnetic door for quick access and additional cable management.
> Laminate modesty panels (optional) are 9"H and are recessed 14" from the guest edge, inset inside frame.
> Wire chase is black.

Ordering Information:

> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**

Product Specifications:

> Return Stacker Surface sits on 24"H overlay cabinets to form a 29.75"H L-shape Desk.
> Return Stacker widths are calculated based on the length of the Overlay Cabinet. Subtract 36"W for the Overlay Desk and subtract 12"W or 18"W depending on the size of the Stack-On Tower (if specified).
> Return Stackers are held up by flat plates on one end and L-brackets on the opposite side when the Stack-On Tower is present. Black post feet are used instead when the Stack-On Tower is not present.
> Return Stacker surfaces are 1.25" thick and feature either a knife or 3mm edge (front only).
> Credenza Layering Shells are panel-based shells designed to form 90-degree junctions in the back of an office to complete a U-shaped configuration.
> Credenza Layering Shell tops are 1.25" thick and come available in a 3mm edge (all sides) or knife edge (two sides). Tops are supported by a 20"Wx20"W L-shaped support panel and two black post feet.

Display Area - Wall-Mounted Back-Painted Glass Whiteboards

Product Specifications:

> The Display Area is the area above the worksurface/return credenza to either the bottom of the overhead storage (if specified) or to the desired overall office height: 66"H, 72"H, or 80"H.
Note: The total height of 66"H and 80"H offices are 66⅞" and 80⅞". The actual height of 72"H offices is 72".
> Display Area products such as Tackboards, Glass Whiteboards, and Display Shelf Walls mount with provided wall cleats. Drywall (or other) hardware is not included.
> Spacing exists behind display area products for LED light cable routing.
> Specifying the correct height: many dimensional options are available. Overall office height, overhead storage height, and floor cabinet height drive the display area height requirements. Guidance in this area is provided below to ensure the correct height is specified.
> Specifying the correct width: Glass Whiteboards are only available in 36" widths.
> Markerboards are ¼" thick, annealed, and back-painted white
> Additional sizes are available as specials but will incur an upcharge due to bulk import purchasing of standard sizes. Contact designteam@enwork.com for more information.

> Spacing exists behind display area products for LED light cable routing.

> Specifying the correct height: many dimensional options are available. Overall office height, overhead storage height, and floor cabinet height drive the display area height requirements. Guidance in this area is provided below to ensure the correct height is specified.

> Specifying the correct width: for multi-material display areas, Enwork recommends a 36"W tack, glass, or display shelf above the Overlay Desk and a different material for the remainder of the area.
The overall width of the remaining area is found by taking the width of the Overlay Cabinet and subtracting the width of the 36"W portion already specified. Then, subtract the Stack-On Tower width if present (12"W or 18"W). Get creative! Design any combination of display elements that fit your space.

> For single-material Tackboards in the display area, specify a 66"W or 72"W Tackboard and Overlay Cabinet.

Product Specifications:

> The Display Area is the area above the worksurface/return credenza to either the bottom of the overhead storage (if specified) or to the desired overall office height: 66"H, 72"H, or 80"H.
Note: The total height of 66"H and 80"H offices are 667/8" and 807/8". The actual height of 72"H offices is 72".
> Display Area products such as Tackboards, Glass Whiteboard, and Display Shelf Walls mount with provided wall cleats. Drywall (or other) hardware is not included.
> Spacing exists behind display area products for LED light cable routing.
> Display Shelf Walls consist of a laminate back wall panel with either a laminate or sold aluminum shelf. Shelves are 12"D. Walls are available in six heights depending on the overall office height and overhead chosen. 28"H and 34"H Display Shelf Walls come with one shelf. 42"H and 48"H come with two shelves. 56"H comes with three shelves.
> Laminate Display Shelf Walls are available in six widths: 18"–48". Solid aluminum shelves are available in four widths: 24"–42".
> Do not put Display Wall shelves above height-adjustable areas.
> Specifying the correct height: many dimensional options are available. Overall office height, overhead storage height, and floor cabinet height drive the display area height requirements. Guidance in this area is provided below to ensure the correct height is specified.
> Specifying the correct width: for multi-material display areas, Enwork recommends a 36"W tack, glass, or display shelf above the Overlay Desk and a different material for the remainder of the area. The overall width of the remaining area is found by taking the width of the Overlay Cabinet and subtracting the width of the 36"W portion already specified. Then, subtract the Stack-On Tower width if present (12"W or 18"W). Get creative! Design any combination of display elements that fit your space.

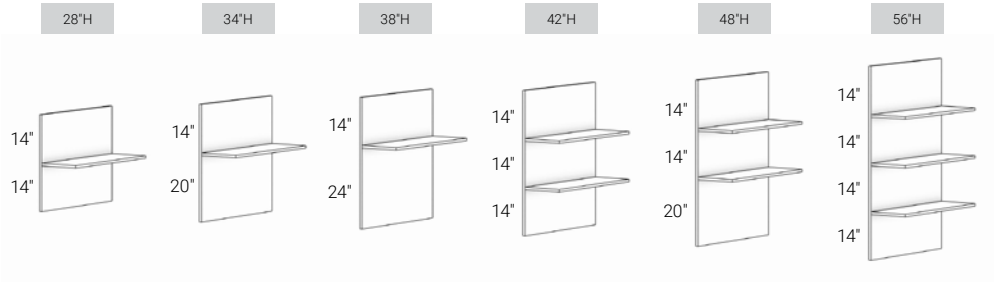

Ordering Information:

> For LED Lighting, driver/switch kit must be specified separately.
> Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.

Product Specifications:
> Beam sections available in 48", 54", 60", and 72" wide. Other widths available upon request.
> A maximum of 24 Cat5 cables (UTP Solid 24AWG/4PRS) fit within a beam.
> Jet Beams are for use with freestanding tables.
> One leg per pack comes with a routing hole in the bottom of the leg column to run infeed and ethernet cables from the floor to the beam. When placing leg directly on top of floor core, all feet have a center hole for cords to pass through directly into column.
> Beams using the T-leg with levelers are 0.8" taller, putting overall height at 24.8" and 29.8".
> Each beam section has two windows for duplex receptacles (ordered separately), and one window for data (data tree included) per user. For single-sided power this is on one side. For double-sided power this is on both sides.
> Optional cable trough is available on page 510. Cable trough hangs below beam.
> For packs with 48", 54", and 60"W beam sections, center legs on 2-sided 6-pack, 1-sided 3-pack, 2-sided 14-pack, and 1-sided 7-pack do not allow for infeed. See page 475.
> For packs with 48", 54", and 60"W beam sections, not all beam sections require a leg, instead a support bar is used for strength. Packs with 72"W beam sections have a leg at each seam.

Ordering Information:
> Beam infeeds and receptacles are ordered separately.
> **Freight is included on orders over $2,000 net. A freight fee of $200 net is assessed on orders less than $2,000 net. See page 11.**
